## **Nurse In South America:**

*Telenurse* R. A. Mortensen, 1997 This book is dedicated to the promotion of the International Classification Nursing practice ICNP in Europe and to demonstrate how comparative tele matic based nursing data can be used in nursing modules of the electronic patient records Using ICNP as structured data entry will counter the lack of uniform comparative descriptive data on nursing care and enhance the clinical nursing research potential of electronic patient records It is the aim of TELENURSE not only to advance nursing documentation from the stage of paper and pen to the stage of modern telematic but also to advance electronic nursing documentation from isolated systems to integrated nursing modules of the electronic patient records Integrations spanning from data integration to integration of nursing modules with an overall architecture of electronic patient records require on the one hand different competencies and skills On the other hand integration can only be accomplished between equal partners The marriage of nursing knowledge to telematic knowledge within TELENURSE is believed to result in new generations of comprehensive and integrated telematic applications which will be of benefit to the whole health care sector This book will update you on the insights with respect to the electronic applicability of the ICNP in a European Health Environment The Trained Nurse and Hospital Review ,1923 The Modernization of the Nursing Workforce Ian Kessler,Paul Heron,Sue Dopson,2012-08-02 The Modernization of the Nursing Workforce Valuing the healthcare assistant is based on recently completed research exploring the role of healthcare assistants HCA in acute hospitals Whilst a support role working alongside registered nurses has been a longstanding feature of the NHS the contemporary HCA role has become increasingly central to the process of health service modernization The role is now assuming even greater importance as the ramifications of financial constraints restructuring and other pressures on the NHS play out The issue is becoming increasingly relevant as the government has commissioned an independent review into the role of healthcare assistants the Cavendish Review which uses this book extensively The HCA role is unregulated and low paid but by taking on direct care tasks from registered nurses the role has become politically sensitive The HCA remains a cheap and flexible source of labour but the unregulated role encourages dilemmas and public scrutiny over risk and patient safety The book explores how public policy reform of the health service feeds through to impact upon the management and structure of the healthcare workforce More specifically the book provides a timely evidence base for the extended and growing use of the HCA role The book draws upon a multi method research design from four geographically located hospital trusts in England which during a three year period saw over 270 staff interviewed focus groups and interviews with over 100 patients some 275 hours of ward based observation and detailed survey responses from over 3 000 members of staff and hospital patients The unusual richness of the data allows a definitive examination of who undertakes the HCA role its shape nature and diversity along with the consequences for those with a stake in the role hospital managers the assistants themselves the patients they care for and the nurses they work alongside making The
