Hadley,2013-06-29 Undeniably language is at the core of human existence Merleau Ponty 1945 posited that thought and language are one cognition being language language cognition Although such a categorical stance can be challenged from a number of theoretical perspectives as dogmatic and nonveridical the critical role of language in humanness is irrefutable It is what defines and distinguishes creatures at the apex of the phylogenetic scale The fact that cognition predates verbal fluency and can take various nonverbal forms does not diminish the pivotal role of language it is a functional requisite an imperative More than a mere vehicle to express thought it transforms modifies and shapes much of cognition It cannot be trivialized On many grounds man is capably rivalled by lower forms of existence the gazelle is more graceful the lion is stronger the cheetah is fleeter It is through his use of symbols that man usurps the ascendant position Cassirer in Essay on Man 1946 described man as animal symbolicum the animal that creates symbols and a symbolic world Through language humans transcend time and are able to describe events temporally removed to reflect on the past to conjecture the future With words man can paint pictures muse and dream embrace and console persuade and corrupt educate and be educated Language is a preferred performatory domain nowhere more than in Western Civilization

**Comprehensive Casebook of Cognitive Therapy** Frank M.

Dattilio,2013-06-29 This is the golden age of cognitive therapy Its popularity among society and the professional community is growing by leaps and bounds What is it and what are its limits What is the fundamental nature of cognitive therapy It is to my way of thinking simple but profound To understand it it is useful to think back to the history of behavior therapy to the basic development made by Joseph Wolpe In the 1950s Wolpe astounded the therapeutic world and infuriated his colleagues by finding a simple cure for phobias The psychoanalytic establishment held that phobias irrational and intense fear of certain objects such as cats were just surface manifesta tions of deeper underlying disorders The psychoanalysts said their source was the buried fear in male children of castration by the father in retaliation for the son s lust for his mother For females this fear is directed toward the opposite sex parent The biomedical theorists on the other hand claimed that some as yet undiscovered disorder in brain chemistry must be the underlying problem Both groups insisted that to treat only the patient s fear of cats would do no more good than it would to put rouge over measles Wolpe however reasoned that irrational fear of something isn t just a symptom of a phobia it is the whole phobia
