Nursing Physician Control and the Medical Monopoly Historical Perspectives on Gendered Inequality in Roles Rights and Range of Practice Thetis M Group and Joan I Roberts A history of physicians efforts to dominate the healthcare system Nursing Physician Control and the Medical Monopoly traces the efforts by physicians over time to achieve a monopoly in healthcare often by subordinating nurses their only genuine competitors Attempts by nurses to reform many aspects of healthcare have been repeatedly opposed by physicians whose primary interest has been to achieve total control of the healthcare system often to the detriment of patients health and safety Thetis M Group and Joan I Roberts first review the activities of early women healers and nurses and examine nurse physician relations from the early 1900s on The sexist domination of nursing by medicine was neither haphazard nor accidental but a structured and institutionalized phenomenon Efforts by nurses to achieve greater autonomy were often blocked by hospital administrators and organized medicine The consolidation of the medical monopoly during the 1920s and 1930s along with the waning of feminism led to the concretization of stereotyped gender roles in nursing and medicine The growing unease in nurse physician relations escalated from the 1940s to the 1960s the growth and complexity of the healthcare industry expanding scientific knowledge and increasing specialization by physicians all created heavy demands on nurses Conflict between organized medicine and nursing entered a public open phase in the late 1960s and 1970s when medicine unilaterally created the physician s assistant countered by nursing s development of the advanced nurse practitioner But gender stereotypes remained central to nurse physician relations in the 1980s and into the 1990s Finally Group and Roberts examine the results of the medical monopoly from the impact on patients health and safety to the development of HMOs and the current overpriced poorly coordinated and fragmented healthcare system Thetis M Group is Professor Emerita at Syracuse University where she was Dean of the College of Nursing for 10 years and an adjunct faculty member at the University of Utah College of Nursing She is co author of *Feminism and Nursing* and has published numerous articles in professional nursing journals Joan I Roberts social psychologist is Professor Emerita at Syracuse University A pioneer in women s studies in higher education she is co author of *Feminism and Nursing* and author of numerous books and articles on gender issues and racial and sex discrimination June 2001 352 pages 6 1 8 x 9 1 4 index append cloth 0 253 33926 X 29 95 s 22 95 **Nursing against the Odds** Suzanne Gordon,2012-05-15 In the United States and throughout the industrialized world just as the population of older and sicker patients is about to explode we have a major shortage of nurses Why are so

many RNs dropping out of health care's largest profession. How will the lack of skilled experienced caregivers affect patients? These are some of the questions addressed by Suzanne Gordon's definitive account of the world's nursing crisis. In *Nursing against the Odds*, one of North America's leading health care journalists draws on in-depth interviews, research studies, and extensive firsthand reporting to help readers better understand the myriad causes of and possible solutions to the current crisis. Gordon examines how health care cost cutting and hospital restructuring undermine the working conditions necessary for quality care. She shows how the historically troubled workplace relationships between RNs and physicians become even more dysfunctional in modern hospitals. In Gordon's view, the public image of nurses continues to suffer from negative media stereotyping in medical shows on television and from shoddy press coverage of the important role RNs play in the delivery of health care. Gordon also identifies the class and status divisions within the profession that hinder a much-needed defense of bedside nursing. She explains why some policy panaceas, hiring more temporary workers, importing RNs from less developed countries, fail to address the forces that drive nurses out of their workplaces. To promote better care, Gordon calls for a broad agenda that includes safer staffing, improved scheduling, and other policy changes that would give nurses a greater voice at work. She explores how doctors and nurses can collaborate more effectively and what medical and nursing education must do to foster such cooperation. Finally, Gordon outlines ways in which RNs can successfully take their case to the public while campaigning for health care system reform that actually funds necessary nursing care.
