Nursing Research Carolyn Feher Waltz, R. Barker Bausell, 1981 **Person-centred Nursing Research: Methodology, Methods and Outcomes** Jan Dewing, Brendan McCormack, Tanya McCance, 2021-04-26 This book is the first ever to offer a contemporary collection of different perspectives on person centredness in international doctoral nursing research The research in the book is based on the ideas and values of personhood and person centeredness which have been used and can be seen to guide research approaches inform research designs and theorize research findings Further a specific framework for person centred nursing is embedded throughout the research studies presented in the text The Person centred Nursing Framework PCNF developed by Brendan McCormack and Tanya McCance in 2010 is recognized as a nursing theory and this book further develops it as a basis for research and for advancing person centredness in nursing The framework informs all stages of the research process from design through to dissemination The book is structured into a number of highly engaging chapters written by doctoral candidates and recently graduated candidates The opening and closing chapters written by the editors place the subsequent chapters in a global context of person centredness and nursing The potential for person centred nursing research to be a global movement is recognized and debated The subsequent chapters lead readers through philosophical ideas methodologies and methods whilst also offering reflective and honest insights into learning how to become a person centred researcher This field is growing and developing but yet there is no

specific book available As a result researchers spend considerable time and effort translating existing research methodologies into person centred perspectives This book fills this gap and acts as a key resource for future nurse researchers The text is intended for and benefits nursing doctoral candidates masters candidates and academic staff who teach and supervise research candidates it may also appeal to other graduate learners The book has international contributions which makes it appealing internationally div Nursing Research Janice M. Morse,Peggy-Anne Field,2013-11-11 Nursing Research Using Participatory Action Research Mary De Chesnay,2014-12-05 PAR is the ultimate in social justice practice I suggest that PAR should be the basis for all nursing research This book will provide you with the basics for getting started Patricia J Kelly PhD MPH APRN University of Missouri Kansas City From the Foreword Participatory action research is a qualitative research method conducted in collaboration with a community of people in order to effect changes in the community that are relevant to the residents This is a practical how to resource for conducting participatory action research that guides readers step by step through planning conducting and disseminating nursing research using this qualitative design It is part of a unique series of seven books devoted to nursing research using qualitative designs and methods Examples from actual research along with author commentary illustrate potential pitfalls and challenges that may occur during the process and how to resolve them Written by a leading scholar of nursing research and nurse experts in participatory action research the book describes its philosophical underpinnings and state of the art techniques and provides a concrete road map for planning and conducting studies It considers why this particular research method is best suited for a particular study ethical considerations and potential obstacles The book also discusses how to ensure rigor during a study providing examples from scholarly literature and the authors own work Each case example features a description of the study including why the investigator decided to use participatory action rather than another research design how he or she solved gatekeeper and access to sample issues and institutional review board concerns Also included is a discussion of how to collect and analyze data and how to disseminate findings to both the scientific community and research participants With a focus on practical problem solving throughout the book will be of value to novice and experienced nurse researchers graduate teachers in service educators students and nursing research staff at health care institutions Key Features Describes step by step how to plan conduct and disseminate participatory action research Delivers new designs and methods Focuses on solving practical problems related to the conduct of research Features rich nursing exemplars in a variety of health mental health clinical conditions in the United States and internationally Nursing Research Geri LoBiondo-Wood,Judith Haber,1986 **Nursing Research** Judith Haber,1998 An overview of the evolution of nursing research with real world examples For undergraduate students who are learning the steps of the research process learning how to critiques published research literaturw and learning when and how to apply research findings in clinical practice *Nursing and Midwifery Research* Dean Whitehead,Geri LoBiondo-Wood,Judith Haber,2012-10-30 The new

edition upholds the premise that knowledge about research process and design is mandatory in today's health care arena and that all nurses and midwives need to understand research findings and their implication for changing practice. It is completely revised with many new chapters. The text has been restructured into three sections. Section 1 Research Awareness sets the scene for the importance of nursing and midwifery research and provides an overview of research theory and practice as processes. Chapters on searching for and reviewing the literature provide detailed advice for undergraduates and facilitate access to research articles online. One of the new chapters discusses ethical issues in Australia and New Zealand. Section 2 Appreciation and Application provides a detailed discussion of qualitative, quantitative and mixed methods research approaches with many useful examples from the clinical area. Section 3 Conducting primary research is new and is designed to accommodate both undergraduate and postgraduate students in their research effort. Writing research proposals may be a requirement for undergraduates in their research program and postgraduates will find the information useful for undertaking a higher degree or applying for university or external funding. This final Section is also useful as a guide on disseminating and publishing conducted research findings. Combined Australian and New Zealand editorship ensures greater trans Tasman coverage, awareness and relevance. Contributions from international luminaries are balanced by a heightened focus on research conducted within Australia and New Zealand. New edition conscientiously recognises midwifery research as related to but independent from nursing. The research process driven approach is directed towards consumers of research and the comprehensive coverage extends from undergraduate through to a postgraduate level of knowledge. Expanded pedagogy includes Key Terms and Learning Outcomes at the beginning of each chapter. Icons throughout that direct readers to web based material. Evidence based Tips, Research in Brief boxes and Points to Ponder for constant reinforcement that links evidence to practice. Integrated Tutorial Triggers with suggested answers provided and Multiple Choice Questions enable students to assess their understanding of key points. Evolve Website provides True/False questions and access to journal articles cited in the text with additional reflective questions.

Chapter 1 The significance of nursing research identifies the current changes in practice and future directions in Australian health care. Previous chapters 3 and 4 have been combined to become Chapter 3 Searching and reviewing the literature. A detailed discussion of qualitative, quantitative and mixed methods research approaches. Increased Australian and New Zealand context and research examples. More accessible language throughout.

Nursing Research Denise F. Polit, Bernadette P. Hungler, 1983. The Sixth Edition of this classic text maintains its place as the Gold Standard of nursing research. Nationally and internationally known, respected and used, the text provides readers with the skills they need to design and implement a research investigation and critically evaluate published research reports. Now completely revised and updated to reflect the latest trends in quantitative and qualitative research, this essential guide offers a focused how to approach. New in this edition: expanded discussion of qualitative approaches, demonstration of qualitative and quantitative approaches working together, charts and tables offer description of qualitative approaches.
