Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Measuring and Collecting Pay Information from U.S. Employers by Gender, Race, and National Origin, 2013-03-01 U S agencies with responsibilities for enforcing equal employment opportunity laws have long relied on detailed information that is obtained from employers on employment in job groups by gender and race ethnicity for identifying the possibility of discriminatory practices The U S Equal Employment Opportunity Commission EEOC the Office of Federal Contract Compliance programs of the U S Department of Labor and the Civil Rights Division of the U S Department of Justice have developed processes that use these employment data as well as other sources of information to target employers for further investigation and to perform statistical analysis that is used in enforcing the anti discrimination laws The limited data from employers do not include with a few exceptions the ongoing measurement of possible discrimination in compensation The proposed Paycheck Fairness Act of 2009 would have required EEOC to issue regulations mandating that employers provide the EEOC with information on pay by the race gender and national origin of employees The legislation was not enacted If the legislation had become law the EEOC would have been required to confront issues regarding currently available and potential data sources methodological requirements and appropriate statistical techniques for the measurement and collection of employer pay data The panel concludes that the collection of earnings data would be a significant undertaking for the EEOC and that there might be an increased reporting burden on some employers Currently there is no clearly articulated vision of how the data on wages could be used in the conduct of the enforcement responsibilities of the relevant agencies Collecting Compensation Data from Employers gives recommendations for targeting employers for investigation regarding their compliance with antidiscrimination laws Art Et Architecture Au Canada Loren Ruth Lerner, Mary F. Management as Critical Museum Practice brings into focus the knowledges value systems ethics and workplace pragmatics that are foundational for this work Rather than engaging solely with cultural modifications such as Indigenous care practices the book presents local knowledge of place and material which is relevant to how collections are managed and cared for worldwide Through discussion of varied collection types management activities and professional roles contributors develop a contextualised reflexive practice for how core collections management standards are conceptualised negotiated and enacted Chapters span national museums in Brazil and Uganda to community led heritage work in Malaysia and Canada they explore complexities of numbering digitisation and description alongside the realities of climate change global pandemics and natural disasters The book offers a new definition of collections management travelling from what is done to care for collections to what is done to care for collections and their users Rather than use being an end goal it emerges as a starting point to rethink collections work
