The Changing Structure of the World Oil

Industry David Hawdon, 2017-09-06 Originally published in 1985 by a group of international experts and oil industry officials this book surveys the dramatic changes which took place in the oil industry in the second half of the twentieth century It discusses the role of OPEC and the long term impact its decisions had for both producers and oil consumers and examines possible future trends in the oil industry structure and stability together with the possible consequences for North Sea oil and gas development

OPEC and the International Oil Industry F.J. Al-Chalabi, 1981-02-28 The origin of this significant and timely book was a lecture on the structural changes in the international oil industry prepared by Dr Al Chalabi for the OAPEC annual course on the Fundamentals of Oil and Gas It was given in Arabic in February 1978 when the author was Assistant Secretary General of OAPEC The author has succeeded in expanding and updating the basic aspects of the subject He has managed in this relatively short book to survey and analyse the main structural changes in the international oil industry during the last 35 years with special emphasis on the revolutionary changes of the 1970s The book clearly demonstrates the significance of these changes in terms of their impact on the power of control and decisions concerning the ownership of oil resources their marketing outlets and price policy It explains how the concession system and the various consortia arrangements among the transnational oil companies gave them maximum freedom and flexibility in the control and management of crude oil production and pricing Their vertical and horizontal integration enabled them to control and manage upstream and downstream operations on a global basis and with the effectiveness of a powerful international Cartel

International Oil Markets C. van der Linde, 2013-03-14 Writing this book would have been impossible without the help of certain institutions and persons For a gas producing and oil processing country like the Netherlands there was surprisingly

very little publicly available research material Public libraries collections contained with a certain degree of inconsistency little of the more specialised sources I would therefore like to express my gratitude towards Royal Dutch Shell and especially the library staff in The Hague for allowing me to use the company s library thanking them for their assistance in finding and supplying the required data I am also grateful for the financial assistance of the Nederlandse organisatie voor wetenschappelijk onderzoek NWO and the Faculty of Law of the University of Leiden They provided the financial means to work a crucial month in the very well equipped library of the Oxford Institute for Energy Studies I am indebted to the staff of the Oxford Institute for Energy Studies and particularly to Robert Mabro and Jeremy Turk for their comments support and friendship After I spent a month in the Institute in July 1989 I was able to return for two five month periods in 1990 and 1991 For both periods the Oxford Institute and the Leiden Law Faculty provided me with the necessary means I would also like to express special gratitude to some people who have been a great support and supplied me with valuable comments at various stages of the study India, GCC, and the Global Energy Regime Samir Ranjan Pradhan,2008 Addressing the bilateral economic relations between India and the Gulf Cooperation Council in the face of massive energy consumption increases this analysis argues that the evolving pattern of energy related links will act as a stimulant and boost these relations This volume cites India s trajectory and importance explaining that Asia s burgeoning demand for oil and gas is a crucial factor in the current world energy market and has occupied center stage in the contemporary discourse on global energy security

Hunter,2016-12-29 The classic reference work that provides annually updated information on the countries of the world *Oil Economics and Policy* Alberto Clo,2013-03-09 In 20th century society oil has played a fundamental role not only from the economic point of view but also from the point of view of the political relationships established between major Western countries and oil producing countries A survey into oil history its market dynamics and price evolution is essential for a deeper understanding of modern industry and world economy as world development depends on oil supplies prices and its political accessibility *Oil Economics and Policy* follows the historical development of the oil industry and inevitably also covers many aspects of energy resource economy In so doing it pays particular attention to one aspect namely the fixing of oil prices This is mainly in order to attempt to understand whether and by how much the structural transformations that the

oil industry has undergone during the various phases of its existence and the various market structures deriving from them have influenced the dynamics of oil prices Alberto Cl is Professor of Industrial Economics at the University of Bologna Minister of Industry and Trade during Lamberto Dini s government January 1995 May 1996 he has been a member both of national and international scientific boards and of ministerial committees He is author of numerous writings on industrial and energy economies and editor in chief of the journal *Energia*

The Oil Companies and the Arab World Giacomo Luciani,2016-03-02 For many years vertical integration characterized the international oil industry with the same company controlling the entire process from crude exploration and production to the retailing This structure was radically transformed in the 1970s and this book originally published in 1984 examines whether the dis integration which resulted was a long term trend or a temporary phase It examines the attitude of the major international oil companies discusses the policies adopted by oil producing and oil importing countries and the limits of government to government deals underlined The political and strategic implications of re integration are explored and relations between oil exporters and importers and between the USA Europe and the Arab world discussed
