Creating a Transatlantic Marketplace Michelle P. Egan, 2005-07-22 Looking at the current state of the EU US trade relationship this text studies attempts at economic integration and cooperation arguing that it can provide information about the evolution of new policies and practices to manage the transatlantic economy

The United States and Europe in the Global Arena F. Burwell, I. Daalder, 1999-08-26 This book examines cooperation between the United States and Europe on a range of global issues With the Soviet threat no longer a unifying factor the transatlantic partners have sought a new basis for acting together in the post Cold War era The conditions and strategies that determine the success or failure of cooperation in restructuring relations with the East countering the threat of weapons proliferation dealing with so called rogue states and managing the global economy are explored

The United States, the European Union, and the Globalization of World Trade Thomas C. Fischer, 2000-04-30 Professor Fischer presents a comprehensive overview of global trade at the start of a new century from a national regional and international viewpoint He looks closely at the four dominant and competing economic systems the United States the European Union Japan and China and argues that the traditional we win you lose national trade paradigm has been replaced by one that is more collaborative one that is leaning toward de facto world governance He compares foreigners attitudes toward trade and markets with our own using four economic models that typify world trade today He examines the interface between national regional and international trading systems and between business and government then at the prospect of global trade management in different trade sectors under the GATT WTO and other organizations The result is a provocative discussion of global trade today Professor Fischer makes it clear that the United States needs allies Though its influence in the world trade arena will continue America's hegemony has ended The European Union is America's most obvious ally but it has many problems and ambitions of its own The North American Free Trade Agreement has solidified the North American market but it may isolate and lose South America while Japan China Russia and others are left to develop alliances of their own All these factors raise important global questions among them Can American capitalism prevail Should the United States proceed unilaterally as it has so often Or are regional and multinational arrangements preferable If there is further globalization as seems inevitable and if American influence is on the wane what group or organization will lead To explore these questions and provide the beginnings of answers Professor Fischer uses his four competing economic systems and handicaps the process country by country sector by sector with particular attention to transatlantic relations

Deepening and Widening Pierre-Henri Laurent, Marc Maresceau, 1998 Eighteen articles discuss the leading EU issues and institutional reforms at the end of this century such as enlargement security and monetary union as well as relations with the US Russia and the new World Trade Organization Although the contents are not exclusively determined by that agenda the volume was prepared and edited on the eve of and

during the early months of the 1996 IGC which highlighted the struggle between those who seek a more integrated and even a federal Europe and those proposing a looser confederation Annotation copyrighted by Book News Inc Portland OR

Agricultural Trade Policy Timothy Edward Josling, Tim Josling, 1998 The Uruguay Round trade negotiations marked a historic turning point in the reform of agricultural trade The Uruguay Round Agreement on Agriculture URAA replaced nontariff barriers with bound tariffs curbed export subsidies and codified domestic agricultural programs Unfortunately the URAA bound many of the tariffs that replaced nontariff barriers too high it legitimized export subsidies and it left the domestic farm policies of the major industrial countries largely untouched Fortunately regional trade institutions have also begun to grapple with agricultural trade liberalization Agriculture was featured in the Mercosur agreement in recent agreements between the European Union and the countries of Central and Eastern Europe and in the North American Free Trade Area NAFTA Plans for broad supraregional trade structures such as the Asia Pacific Economic Cooperation APEC forum and the Free Trade Area of the Americas FTAA have also dealt with the inclusion of agricultural trade Meanwhile in developing and middle income countries unilateral agricultural policy reforms have been part of recent economic policy changes However in the industrial countries agricultural policy reform has languished in the face of much domestic opposition But the reform of the European Union's Common Agricultural Policy CAP in 1992 and the 1996 Farm Bill in the United States seems to have ushered in a new era of relations between government and agricultural groups The author points out ways that multilateral regional and unilateral paths could be coordinated to liberalized agricultural trade He proposes a set of multilateral talks that would benefit from agricultural reform at all levels and complete the job begun at the Uruguay Round

From Here to Free Trade Ernest H. Preeg, 1998-05-13 In his new book Ernest Preeg analyzes international trade and investment in the 1990s and lays out a comprehensive U S trade strategy for the uncertain period ahead He examines the influence of the World Trade Organization WTO and argues that economic globalization is beneficial to the U S economy in the short to medium term while raising important questions about national sovereignty and security over the longer term Preeg believes regional free trade agreements will soon encompass the majority of world trade but they can conflict with the WTO's multilateral objectives The central challenge for U S trade strategy then is to integrate the now largely separate multilateral and regional tracks of the world trading system The first essay assesses U S interests in economic globalization the second examines recent steps toward free trade at the multilateral and regional levels and the next three offer an in depth critique of U S regional free trade objectives in the Americas across the Pacific and possibly with Europe The final essay presents a multilateral regional synthesis for going from here to free trade over the coming decade

Crisis and Renewal John Van Oudenaren, 2021-09-22 This clear and comprehensive introduction to the European Union considers its development through the theme of crisis and renewal John Van Oudenaren describes EU institutions and policies both historically and as they relate to current events He traces the renewal of the EU that was underway at the end of the 2010s following the euro migration and Brexit crises and the health economic and political crisis that subsequently hit the Union with unexpected force in the coronavirus pandemic of 2020 2021 Exploring how institutions and policies are adapting to unprecedented political economic and geopolitical challenges the author focuses on two key EU priorities digitization and the transition to a carbon neutral future These he argues are both intrinsic policy goals and the means by which the Union hopes to ensure its revitalization and its emergence as a sovereign power taking its place alongside the United States and China as one of the big three players in global politics Explaining the different theoretical perspectives used to understand the EU the book gives students the tools they need to assess whether the Union is on a path to recovery and renewal

Paradoxes of European Foreign Policy Jan Zielonka, 2023-09-29 The European Union's foreign policy is full of paradoxes The Union aspires to be a powerful

international actor without becoming a super state It hopes to prevent and manage conflicts but refrains from acquiring the military means to do so It embarks on the project of widening its borders but continues its deepening project which makes the entrance hurdles for applicant countries ever higher It wishes to maintain strong transatlantic links but continues to build institutions that make the EU more independent from if not competitive with the United States In this stimulating book distinguished European and American intellectuals offer solutions to imperative but unanswered questions How can the Union s enormous normative power of attraction combined with its operational weakness be explained Can the Union remain a civilian power when coping with an uncivilized world Can a European foreign policy get off the ground without prior emergence of a European demos Are national policies within the Union increasingly convergent or divergent And how can the Union s international performance be assessed Globalization and Agricultural Trade Policy Hans J. Michelmann, 2001 A discussion of globalization and agricultural trade policy The contributors explore rapidly evolving environmental policies state trading enterprises and their impact on international prices and competitiveness regional trade agreements and the influence of the WTO on policy A New Beginning Bruce Stokes, 2000 The time is ripe for a bold new initiative to recast the U S Japan economic relationship for the 21st century A new Japan is emerging Foreign investment is on the rise Tokyo is deregulating and restructuring its economy A new generation of entrepreneurs and venture capitalists has emerged But a more vibrant sustainable Japanese economy is threatened by the crushing weight of Japan s mounting public debt the burden of its aging and shrinking population and the cumulative toll of years of economic stagnation New governments in Washington and Tokyo have a unique opportunity to reinvigorate the U S Japan relationship and to accelerate the pace and redirect the nature of change in the Japanese economy by creating a U S Japan open marketplace free of tariffs with minimal regulatory impediments and an increasing freedom to do business by the year 2010 This effort would include harmonization and mutual recognition of domestic regulations meaningful enforcement of competition policy deeper restructuring of the Japanese economy and a dramatic increase in Japanese imports and greater acceptance of foreign investment In this effort the United States must assert its economic self interest through new structural and sectoral trade initiatives and stepped up multilateral market opening pressure through cases brought to the World Trade Organization A New Beginning Recasting the U S Japan Economic Relationship by Bruce Stokes is a road map for U S Japan economic relations in the 21st century

Deepening the Atlantic Wolfgang H. Reinicke, 1996 With the end of the Cold War many have argued that the close economic relationship between the United States and Europe should replace the security alliance as the primary basis of the transatlantic partnership In this book Wolfgang Reinicke critically assesses the basic premise of such a proposition and examines two concrete proposals that have been made to strengthen transatlantic economic relations a Transatlantic Free Trade Area TAFTA and a New Transatlantic Marketplace According to Reinicke a TAFTA is likely to be both too little tariffs and quantitative restrictions being of importance in a few sectors only and too much their elimination being unrealistic in the short term The idea of a New Transatlantic Marketplace he says fits with the fact that the United States and the European Union form the core of the global economy Keeping its limits and risks in mind it could provide the relationship with a new foundation for the 21st century
