Opening Doors Wider Sylvia Bashevkin, 2010-01-01 From the days of the fur trade through the contemporary period women have played important roles in the public life of Canada Until the 1970s however these contributions were generally overlooked *Opening Doors Wider* looks at the progress made in the last forty years to raise the profile of women s involvement in public life The contributors focus on two questions with reference to community activism the politics of feminist organizing parties and elections and the communications environment in which politicians operate First are the doors to participation presently open wider than they were in the past Second how can these doors be opened wider both in terms of real world participation and our scholarly understanding of public engagement These tightly argued essays shed new light on the quality of public involvement of women in one of the world s most stable democracies The nuanced discussion of solutions as well as problems makes it an indispensable resource for students and practitioners of politics at all levels

Playwright, Space and Place in Early Modern Performance Tim Fitzpatrick, 2011-01-01 Analyzing Elizabethan and Jacobean playtexts for their spatial implications this innovative study discloses the extent to which the resources and constraints of public playhouse buildings affected the construction of the fictional worlds of early modern plays The study argues that playwrights were writing with foresight inscribing the constraints and resources of the stages into their texts It goes further to posit that

Shakespeare and his playwright contemporaries adhered to a set of generic conventions rather than specific local company practices about how space and place were to be related in performance the playwrights constituted thus an overarching virtual company producing playtexts that shared features across the acting companies and playhouses By clarifying a sixteenth to seventeenth century conception of theatrical place Tim Fitzpatrick adds a new layer of meaning to our understanding of the plays His approach adds a new dimension to these particular documents which though many of them are considered of great literary worth were not originally generated for any other reason than to be performed within a specific performance context The fact that the playwrights were aware of the features of this performance tradition makes their texts a potential mine of performance information and casts light back on the texts themselves if some of their meanings are spatial these will have been missed by purely literary tools of analysis **Escape Into Life** Pheather Johnson,2005-06
