Open-Field Farming in Medieval Europe Warren Ault, 2013-11-05 This book presents a detailed account of the cooperative practice of agriculture in medieval England shedding much light on how medieval villagers governed their own affairs During this period co operation was essential in ploughing sowing and reaping with communal control of the pasturing of the fallow and stubble These practices were set out in customary by laws which were agreed to by common consent and villages themselves were greatly involved with their enactment and enforcement In the course of time many of the by laws were put into writing Professor Ault has travelled extensively throughout England collecting and researching these agrarian ordinances and translating them into modern English Since it was first published in 1972 this analysis has provided new insight into the organizational structure and governance of medieval villages in England and is essential reading for all those interested in the history of the Middle Ages

**Open-field Farming in Medieval England** Warren O. Ault, 1972      **Field Systems and Farming Systems in Late Medieval England** Bruce M.S. Campbell, 2023-05-31 The later Middle Ages was an overwhelmingly rural world with probably three out of four households reliant upon farming for a living Yet conventional accounts of the period rarely do justice to the variety of ways in which the land was managed and worked The thirteen essays collected in this volume draw upon the abundant documentary evidence of the period to explore that diversity In the process they engage with the issue of classification without which effective generalisation is impossible and offer a series of solutions to that particularly thorny methodological challenge Only through systematic and objective classification is it possible to differentiate between and map different field systems husbandry types and land use categories That in turn makes it possible to consider and evaluate the relative roles of soils and topography institutional structures and commercialised market demand in shaping farm enterprise both during the period of mounting population before the Black Death and the long era of demographic decline that followed it What emerges is an agrarian world more commercialised differentiated and complex than is usually appreciated whose institutional and agronomic contours shaped the course of agricultural development for centuries to come

**Growth in a Traditional Society** Philip T. Hoffman, 2018-06-05 Philip Hoffman shatters the widespread myth that traditional agricultural societies in early modern Europe were socially and economically stagnant and ultimately dependent on wide scale political revolution for their growth Through a richly detailed historical investigation of the peasant agriculture of ancien r gime France the author uncovers evidence that requires a new understanding of what constituted economic growth in such societies His arguments rest on a measurement of long term growth that enables him to analyze the economic institutional and political factors that explain its forms and rhythms In comparing France with England and Germany Hoffman arrives at fresh answers to some classic questions Did French agriculture lag behind farming in other countries If so did the obstacles in French agriculture lurk within peasant society itself in the peasants culture in their communal property rights or in the small scale of their farms Or did the obstacles hide elsewhere in politics in the tax system or in meager opportunities for trade The author discovers that growth cannot be explained by culture property rights or farm size and argues that the real causes of growth derived from politics and gains from trade By challenging other widely held beliefs such as the nature of the commons and the workings of the rural economy Hoffman offers a new analysis of peasant society and culture one based on microeconomics and game theory and intended for a wide range of social scientists
