Opera Omnia Latina:

Opera omnia Latina Pintus,1584 Opera omnia latina Hector Pinto,1584 **Thomas More's Vocation** Frank Mitjans,2023-01-31 The book considers Thomas More's early life choices An early letter is cited by biographers but most miss More's reference to the market place More's great grandson Cresacre a Londoner understood it correctly and that gives reason to trust him on other aspects of More's youth This study is based on early testimonies those of Erasmus Roper Harpsfield Stapleton and Cresacre More as well as More's early writings the Pageant Verses and his additions omissions to the Life of Pico evidence drawn from authors he recommended like Hilton and Gerson and finally his epitaph Attention is given to his lectures on St Augustine's City of God and to St John Chrysostom It is argued More studied Chrysostom's Homilies on the Gospel of St Matthew i from a Greek manuscript Chrysostom in the introductory homily spoke of the city and the market place as the setting in which Christians practice the teaching of Christ More practiced law and taught it He was attracted to becoming a Christian humanist alongside Grocyn Colet Linacre and Lily With them he studied Greek the classics and Fathers of the Church Helped by them he became a man of prayer aware of the need to seek holiness in the midst of the world as a layman Faced with the dilemma of the humanist in choosing between the contemplative life of the philosopher and an active life of engagement with the world he deliberately chose the active life in service to society and the contemplative life of the Christian as a married man This awareness and choice is what is called vocation implying determination to persevere throughout life More saw his life as a pilgrimage towards heaven as described in the last chapter focusing on More's last work *De tristitia tedio pavore et oratione christi ante captionem eius* **Bibliotheca Warneriana, sive, Catalogus librorum ... Joan Warneri ... quorum auction habenda est ... 16o die Feb. 1684'5/6'. ,1685** The Breath of God Etienne Veto,2019-11-27 The Holy Spirit is in a way the most mysterious of the three names of God For many it is the unknown God Acts 17 23 How can a Spirit be love How can it be a person What role can a Spirit have in the trinitarian relations In *The Breath of God* Veto argues that a more exact comprehension of the third divine person can be reached by considering the way it acts in the economy of salvation and how it reveals itself in its scriptural names Ruah and Pneuma breath or wind Just as in the eternal life of God the Father and the Son are precisely what their names designate likewise the Holy Spirit is the Breath of God The procession of the Spirit is the breathing out of the Father into the Son the communication of one intimacy into another and the breathing back of the Son into the Father This leads to reshaping many aspects of trinitarian theology in particular divine personhood It is also fruitful for the believer's life of prayer because it offers a better understanding of the distinct relationship one can have to Father Son and Spirit *Galatians, Ephesians, Philippians* Thomas C. Joseph McMullen, Georgia Henley, 2018-02-01 Gerald of Wales c 1146 c 1223 widely recognized for his innovative ethnographic studies of Ireland and Wales was in fact the author of some twenty three works which touch upon many aspects of twelfth century life Despite their valuable insights these works have been vastly understudied This collection of essays reassesses Gerald's importance as a medieval Latin writer and rhetorician by focusing on his lesser known works and providing a fuller context for his more popular writings This broader view of his corpus brings to light new evidence for his rhetorical strategies political positioning and usage of source material and attests to the breadth and depth of his collected works **Catalogue of the Library of the Royal Medical ... Bibliotheca Grenvilliana Thomas Grenville, John Thomas Payne, Henry Foss, British Museum. Department of Printed Books. Grenville Library, 1842 **Embodiments of Will** Michael Frampton, 2008 This book examines the two chief anatomical and physiological embodiment theories of voluntary animal motion which I call the cardiosine and cerebromuscular theories of motion from the time of Aristotle 384-322 B.C. to that of Mondino de' Liuzzi A.D. 1326 The study of animal motion commenced with the ancient Greek natural scientist Aristotle who wrote the monograph *On the motion of animals* *De motu animalium* Subsequent inquiries into voluntary animal motion may be found in a variety of Greek Latin and Arabic compendia commentaries and encyclopedias throughout the ancient and medieval periods The motion of animals was considered relevant to natural philosophers and theologians investigating the nature of the soul and to physicians seeking to discover the causes of disorders of voluntary movement such as epilepsy and tetany The book fills a gap in the scholarly literature concerned with pre-modern studies of the anatomical and physiological mechanisms of will and bodily movement The accompanying photographs of my own anatomical dissections illuminate ancient and medieval conceptual empirical and experimental methods of anatomical and physiological research **Reforging the Great Chain of Being** Simo Knuuttila, 1980-11-30 A sports reporter might say that in a competition all the participants realize their potentialities or possibilities When an athlete performs far below his usual standard it can be said that it was possible for him to do better But the idea of fair play requires that this use of possible refers to another competition It is presumed that the best athlete wins and that no real possibility of doing better is left unrealized in a competition Here we have a use of language a language

game in which modal notions are used so as to imply that if something is possible it is realized This idea does not belong to the general presuppositions of current ordinary usage It is nevertheless not difficult to find other similar examples outside of the language of sports It may be that such a use of modal notions is sometimes calculated to express that in the context in question there are no real alternative courses of events in contradistinction to other cases in which some possible alternatives remain unrealized Even though modal notions are currently interpreted without the presupposition that each genuine possibility should be realized at some moment of the actual history there are contemporary philosophical models of modalities which incorporate this presupposition In his book *Untersuchungen über den Modalkalkül* Anton Hain Meisenheim am Glan 1952 pp 16 36 Oscar Becker presents a statistical interpretation of modal calculi
