## **Opera Workshop Studies In Understanding:**

**Opera Workshop** Raymond Warren, 1995 The starting point for Opera Workshop is that opera has its own conventions musically different from orchestral repertoire and dramatically different from the spoken theatre The book aims to explore how the music drama amalgam actually works and how it is to be understood not only by the audience but also by those taking part the singers producer and conductor Examples from well known operas show how a sensitive response to the music can inform stage action and dramatic pacing The book is structured around the relationship between stage and orchestra covering firstly those operatic traditions where the instrumental music is solely concerned to support the singer Later it explores the emancipation of the orchestra providing atmospheric background and a symphonic dimension There is a chapter on the use of speech in opera comique and Singspiel An innovative feature of the examples is the discussion of interpretations from commercially available video films illustrations with stills stage diagrams and sketches **Opera as**

**Anthropology** Vlado Kotnik, 2016-09-23 This book contemplates the relationship between opera and anthropology It rests on the following central arguments on the one hand opera is quite a new and exotic topic for anthropologists while on the other anthropology is still perceived as an unusual approach to opera Both initial arguments are indicative of the current situation of the relationship between anthropological discipline and opera research The book introduces the work of anthropologists and ethnographers whose personal and professional affinity for opera has been explicated in their academic and biographical accounts Anthropological ethnological ethnographic and semiotic accounts of opera by Claude Lévi Strauss Michel Leiris William O Beeman Denis Laborde Paul Atkinson and Philippe Joseph Salazar establish that opera can be a pertinent object of anthropological interest ethnographic investigation cultural analysis and historical reflection By touching on opera not merely as a musical aesthetic or artistic category but as a social cultural historical and transnational phenomenon that over the last four centuries has significantly influenced and reflected the identity of Western culture and society this monograph suggests that opera and anthropology no longer need be alien to one another *Opera, Power and Ideology* Vlado

Kotnik, 2010 Opera is able to offer enchanting performance sites in which people create and experience glamorous or ecstatic imagined worlds but behind this picture we find a real social organization embraced by reality which makes opera's world and its history accessible for ethnographic enquiry historical reflection and cultural analysis This book therefore presents the author's original anthropological study which shows complex historical socio cultural political economic ideological academic and ethnographic facets of opera culture in Slovenia including the field sites of both Slovenian national opera houses in Ljubljana and Maribor The study explicates how social representations of opera are produced and enacted by different social agents involved within the Slovenian national operatic habitus and how opera is used as an idealized vision of nationhood and national identity in a provincial society **The Singing and Acting Handbook** Thomas De Mallet Burgess, Nicholas
