McCleave,2013 Handel set himself apart from his contemporaries by employing choreographed instrumental music to complement and reinforce the emotional impact of his operas Of his fifty three operas no fewer than fourteen including ten written for the London stage feature dances This book explores the relationship between music drama and dance in these London works dispelling the notion that dance was a largely peripheral element in Italian language operas prior to those of Gluck Taking a chronological approach the author examines operas written throughout various periods in Handel s life beginning with his early London operas including his time at the Royal Music Academy and the Sall operas of the 1730s and concluding with his unstaged dramatic opera *Alceste* 1750 In considering the various influences on Handel particularly the London stage the author blends analysis of information from eighteenth century treatises with that found in more modern studies offering an informed and imaginative understanding of the role dance played in the work of this major figure one who remained responsive throughout his career to the vital and innovative theatrical environment in which he worked

Astronomy with an Opera-glass Garrett Putman Serviss,2022-07-15 Excerpt Star gazing was never more popular than it is now In every civilized country many excellent telescopes are owned and used often to very good purpose by persons who are not practical astronomers but who wish to see for themselves the marvels of the sky and who occasionally stumble upon something that is new even to professional star gazers Yet notwithstanding this activity in the cultivation of astronomical studies it is probably safe to assert that hardly one person in a hundred knows the chief stars by name or can even recognize the principal constellations much less distinguish the planets from the fixed stars And of course they know nothing of the intellectual pleasure that accompanies a knowledge of the stars Modern astronomy is so rapidly and wonderfully linking the earth and the sun together with all the orbs of space in the bonds of close physical relationship that a person of education and general intelligence can offer no valid excuse for not knowing where to look for Sirius or Aldebaran or the Orion nebula or the planet Jupiter As Australia and New Zealand and the islands of the sea are made a part of the civilized world through the expanding influence of commerce and cultivation so the suns and planets around us are in a certain sense falling under the dominion of the restless and resistless mind of man We have come to possess vested intellectual interests in Mars and Saturn and in the sun and all his multitude of fellows which nobody can afford to ignore **The Beggar's Opera, to which is prefixed the Musick to Each Song** John Gay,2022-05-10 The book *The Beggar s Opera to Which is Prefixed the Musick*
