## **Operation Crobbow:**

*Operation Crossbow* Allan Williams, 2013-05-30 The story of the photographic intelligence work undertaken from a country house at Medmenham Buckinghamshire is one of the great lost stories of the Second World War At its peak in 1944 almost 2 000 British and American men and women worked at the top secret Danesfield House interpreting photographs the majority stereoscopic so they could be viewed in 3D to unlock secrets of German military activity and weapons development Millions of aerial photographs were taken by Allied pilots flying unarmed modified Spitfires and Mosquitos on missions over Nazi Europe it was said that an aircraft could land the photographs be developed and initial interpretation completed within two hours marking the culmination of years of experiments in aerial intelligence techniques Their finest hour began in 1943 during the planning stages of the Allied invasion of Europe when Douglas Kendall who masterminded the interpretation work at Medmenham led the hunt for Hitler s secret weapons Operation Crossbow would grow from a handful of photographic interpreters to the creation of a hand picked team and came to involve interpreters from across the Medmenham spectrum including the team of aircraft specialists led by the redoubtable Constance Babington Smith In November that year whilst analysing photographs of Peenemunde in northern Germany they spotted a small stunted aircraft on a ramp This intelligence breakthrough linked the Nazi research station with a growing network of sites in northern France where ramps were being constructed aligned not only with London but targets throughout southern Britain Through the combined skill and dedication of the Crossbow team and the heroism of the Allied pilots throughout late 1943 and 1944 V weapon launch sites were located and through countermeasures destroyed saving hundreds of thousands of lives and changing the course of the war Operation Crossbow is a wonderful story of human endeavour and derring do told for the first time **Operation Crossbow 1944**

Steven J. Zaloga, 2018-07-26 In mid 1943 Allied intelligence began to pick up the signs of unusual German construction in remote locations near the Channel Coast Several massive fortifications were beginning to take shape and they appeared to be oriented towards London Allied intelligence codenamed these sites as Crossbow and began plans to attack them before they could bombard Britain s capital city These Heavy Crossbow sites for the V 1 and V 2 missiles were supposed to be bomb proof but they soon attracted the attention of RAF heavy bombers with the new Tallboy concrete penetrating bombs Fully illustrated with commissioned artwork and contemporary photographs Operation Crossbow 1944 examines the dynamics of the world s first missile war It also describes the parallel American efforts to develop missiles and assault drones to attack the Heavy Crossbow sites including the Air Force s Aphrodite and Navy Anvil projects *Lists and Indexes* Great Britain. Public Record Office, 1964 *U.S. Air Force Tactical Missiles* George Mindling, Robert Bolton, 2008 The U S Air Force Tactical Missiles 1949 1969 The Pioneers offers the rich fascinating history of the first surface to surface tactical missiles of the U S Air Force the winged nuclear capable Matador and Mace missiles and their units and personnel in West Germany Taiwan Korea Okinawa and the United States The U S Air Force Tactical Missiles 1949 1969 The Pioneers ties that unique

era and those of other tactical missiles together in a remarkably broad deep and valuable perspective that also includes the World War II German V 1 and reaches back all the way to the first flight in the United States in 1916 of an aircraft not controlled by a pilot

Lost Destiny Alan Axelrod, 2015-05-19 Alan Axelrod's Lost Destiny is a rare exploration of the origin of today's controversial military drones as well as a searing and unforgettable story of heroism WWII and the Kennedy dynasty that might have been On August 12 1944 Lieutenant Joseph P Kennedy Jr heir to one of America's most glamorous fortunes son of the disgraced former ambassador to Great Britain and big brother to freshly minted PT 109 hero JFK hoisted himself up into a highly modified B 24 Liberator bomber The munitions he was carrying that day were fifty percent more powerful than TNT Kennedy's mission was part of Operation Aphrodite Project Anvil a desperate American effort to rescue London from a rain of German V 1 and V 2 missiles The decision to use these bold but crude precursors to modern day drones against German V weapon launch sites came from Air Corps high command Lieutenant General Jimmy Doolittle daring leader of the spectacular 1942 Tokyo Raid and others concocted a plan to install radio control equipment in war weary bombers pack them with a dozen tons of high explosives and fly them by remote control directly into the concrete German launch sites targets too hard to be destroyed by conventional bombs The catch was that live pilots were needed to get these flying bombs off the ground and headed toward their targets Joe Jr was the first naval aviator to fly such a mission And in the biggest manmade explosion before Hiroshima it killed him

Operation Big Ben Craig Cabell, 2017-03-17 When Hitler unleashed his V1 and V2 rockets on Great Britain in 1944 it was the first military attack on the British civilian population without invasion Innocent families were wiped out without mercy and terror gripped the nation Churchill and the Crossbow Committee knew that widespread panic would soon ensue because the British public were becoming increasingly anxious about the Nazis superior technology which was destroying their lives But through important intelligence from Bomber Command Naval commandos the French and Dutch Resistances in Europe and the precise plotting of V rocket activity in the Filter Room of Fighter Command through air reconnaissance a Top Secret plan was formed to dive bomb V rocket installations with Mark IX and Mark XVI Spitfires Craig Cabell is the writer and historian responsible for bringing Operation Big Ben to world attention He has studied the original documentation since its release from the National Archive in 2004 and interviewed veterans who took part in the operation such as Flight Lieutenant Raymond Baxter Cabell's initial research resulted in many accolades and now resides in the 602 City of Glasgow Squadron Museum But now for the first time Cabell has put together the whole story of Operation Big Ben showing the work of the Crossbow Committee intelligence Commandos under the orders of Commander Ian Fleming the French and Dutch Resistances and the brave men who flew the Spitfires of 124 229 303 453 602 and 603 squadrons For the sake of accuracy and attention to detail this book concentrates on the day to day activity of Spitfires during Operation Big Ben and the work of the various strands of British intelligence before and during it In this book Operation Big Ben is separated from Operation Crossbow the anti V1 operation to show how

the British government stepped up its urgency to counter the V2 threat Although some of the detail could be considered repetitious in places many cuts of non operational flying have been made from the histories of each squadron in order to keep the flow of the book thought provoking and interesting the focus is on accuracy The author has noted that in other publications that touch on Operation Big Ben specific activity has not been documented correctly This is because squadron histories haven't been cross referenced in the past Each squadron history in this book mentions the work of other Big Ben squadrons to report on the filtering of intelligence escort work for other larger operations or the details of the weather conditions experienced and the plight of the Dutch people during the harsh winter of 1944-45 to create a fuller and more visual picture of what happened It is appreciated that aviation historians and enthusiasts alike will analyse this volume for the details of the Spitfires used In a nutshell Mark IX Spitfires started Operation Big Ben These had elliptical wings to begin with and then progressed to clipped wing pin pointing exact dates has not always been possible The Mark XVI became the cream of the crop for the most important squadrons 602 603 and to a lesser degree 303 with 602 being the first to have them followed by 303 Mark V's were used for training purposes For dive bombing purposes two 250 lb bombs were used under each wing for balance with a 500 lb bomb under the fuselage Occasionally just the 500 lb bomb was carried sometime just the two 250 lb bombs depending on how far they had to fly inland or the difficulty of the job in hand the greater weight the more fuel used Version 5 roundel was used and Operation Big Ben insignia on either side of the fuselage

*The Tym Before ...* Nathan Gregory, 2018-03-19 The Cloud It sounds fluffy and soft Amorphous remote floating above the world Run it in the Cloud we say A modern metaphor but we once had another name a more descriptive name for using someone else's computer We called it timesharing Today we mix the idea of using distant computers and the idea of communicating via a network and call the combination The Cloud imagining we have invented something new But it isn't so new after all Beginning in the 1960s a company created a successful business making remote computer services available inexpensively to anyone via a network built for that purpose In doing so they created the first cloud Companies offered online resources from banking to research email to instant messaging and the ability to run applications on powerful remote computers and access them from anywhere They called it Tymnet and the company was Tymshare
