Operation Daybreak:

Cinema and Unconventional Warfare in the Twentieth Century Paul B. Rich, 2018-08-23 Cinematic representations of unconventional warfare have received sporadic attention to date. However, this pattern has now begun to change with the rise of insurgency and counter insurgency in Iraq and Afghanistan and the growing importance of jihadist terrorism in the wake of 9/11. This ground-breaking study provides a much-needed examination of global unconventional warfare in 20th-century filmmaking with case studies from the United States, Britain, Ireland, France, Italy, and Israel. Paul B. Rich examines Hollywood's treatment of counter terrorism and counter insurgency in the United States, British post-colonial insurgencies in Malaya and Kenya, and British special operations in the Second World War, the Irish conflict before and during the Troubles, French filmmaking and the reluctance to deal with the bitter war in Algeria in the 1950s, Italian neorealism and its impact on films dealing with urban insurgency by Roberto Rossellini, Nanni Loy, and Gillo Pontecorvo, and Israel and the upsurge of Palestinian terrorism. Whilst only a small number of films on these conflicts have been able to rise above stereotyping insurgents and terrorists in some cases due to a pattern of screen orientalism, *Cinema and Unconventional Warfare in the Twentieth Century* stresses the positive political gains to be derived from humanizing terrorists and terrorists' movements, especially in the context of modern jihadist terrorism. This is essential reading for academics, postgraduates, and advanced undergraduates interested in 20th-century military history, politics, and international relations, and film studies. **No**

Shortcuts Max Smeets, 2022-06-02 Over the past decade, numerous states have declared cyberspace as a new domain of warfare, sought to develop a military cyber strategy, and establish a cyber command. These developments have led to much policy talk and concern about the future of warfare as well as the digital vulnerability of society. *No Shortcuts* provides a level-headed view of where we are in the militarization of cyberspace. In this book, Max Smeets bridges the divide between technology and policy to assess the necessary building blocks for states to develop a military cyber capacity. Smeets argues that for many states, the barriers to entry into conflict in cyberspace are currently too high. Accompanied by a wide range of empirical examples, Smeets shows why governments' abilities to develop military cyber capabilities might change over time and explains the limits of capability transfer by states and private actors. **British Film Catalogue** Denis
