Lost Nuke Dirk Septer, 2016 A story seemingly drawn out of a Hollywood action script Gripping stuff Canada's History Just before midnight on February 13 1950 three engines of a US Air Force B-36 intercontinental bomber caught fire over Canada's northwest coast The crew jumped and the plane ditched somewhere in the Pacific Ocean Almost four years later the wreck of the bomber was found accidentally in a remote location in the coastal mountains of British Columbia three hours flying time in the opposite direction of where it was supposed to have crashed After years of silence the United States finally admitted to losing its very first nuclear bomb the incident was its first Broken Arrow the code name for accidents involving nuclear weapons But was

the bomb dropped and exploded over the Inside Passage or was it blown up at the aircraft's resting place in the mountains. This Cold War era tale follows the last flight of bomber 075 and attempts to unravel the real story behind more than fifty years of secrecy, misdirection and misinformation. *Tom Clancy's Splinter Cell: Operation Barracuda* David Michaels, 2005-11-01. Keeping track of prolific authors who write fiction series was quite challenging for even the most ardent fan until *To Be Continued* debuted in 1995. Now readers will be happy that the soon to be released second edition has added 1,600 new books and 400 new series. *To Be Continued* Second Edition maintains the first volume's successful formula that featured concise A to Z entries packed with useful information including titles, publishers, publication dates, genre categories, annotations and subject terms. The International Spy Museum's Historian takes us on a wild tour of missions and schemes that almost happened but were ultimately deemed too dangerous, expensive ahead of their time or even certifiably insane. Compulsively readable, laugh-out-loud history. Mary Roach, New York Times bestselling author of *Grunt* and *Stiff*. In 1958 the U.S. Air Force nuked the moon as a show of military force. In 1967 the CIA sent live cats to spy on the Soviet government. In 1942 the British built a torpedo-proof aircraft carrier out of an iceberg. Of course none of these things ever actually happened. But in *Nuking the Moon*, intelligence historian Vince Houghton proves that abandoned plans can be just as illuminating and every bit as entertaining as the ones that made it. Vividly capturing the fascinating stories of how twenty-one plans from WWII and the Cold War went from conception, planning and testing to cancellation, Houghton explores what happens when innovation meets desperation. For every plan as good as D-Day, there's a scheme to strap bombs to bats or dig a spy tunnel underneath the Soviet embassy. Along the way he reveals what each one tells us about twentieth-century history, the art of spycraft, military strategy and famous figures like JFK, Castro and Churchill. By turns terrifying and hilarious but always riveting, this is the unique story of history left on the drawing board. *No Nukes* Anna Gyorgy, 1979. A classic. A comprehensive and accessible presentation of the ins and outs of nuclear power. It includes explanations of nuclear plant operation, the fuel cycle, health and safety hazards, the economics and politics of nuclear power, international anti-nuclear programs and alternative energy sources. *God Does Exist No More Nuclear*
