Operation Mind Control Our Secret Governments War Against Its Own People:

When Doctors Kill Joshua A. Perper, Stephen J. Cina, 2010-08-12 It would come as no surprise that many readers may be shocked and intrigued by the title of our book Some especially our medical colleagues may wonder why it is even worthwhile to raise the issue of killing by doctors Killing is clearly an thetical to the Art and Science of Medicine which is geared toward easing pain and suffering and to saving lives rather than smothering them Doctors should be a source of comfort rather than a cause for alarm Nevertheless although they often don t want to admit it doctors are people too Physicians have the same genetic library of both endearing qualities and character defects as the rest of us but their vocation places them in a position to intimately interject themselves into the lives of other people In most cases fortunately the positive traits are dominant and doctors do more good than harm While physicists and mathematicians paved the road to the stars and deciphered the mysteries of the atom they simultaneously unleashed destructive powers that may one day bring about the annihilation of our planet Concurrently doctors and allied scientists have delved into the deep secrets of the body and mind mastering the anatomy and physiology of the human body even mapping the very molecules that make us who we are But make no mistake a person is not simply an elegant b logical machine to be marveled at then dissected **The Radical Right and the**

Murder of John F. Kennedy Harrison E. Livingstone, 2004 The Radical Right and the Murder of John F Kennedy Stunning Evidence in the Assassination of the President Harrison E Livingstone s major new book the fifth of his works on the death of JFK brings together for the first time all of the central evidence demonstrating a domestic Right Wing conspiracy rooted in Texas which assassinated the President on November 22 1963 The book represents forty years of work The book discusses in great detail the actual medical evidence and the forgery of the autopsy photographs and X rays which Mr Livingstone first exposed the alteration of the autopsy report the framing of the designated patsy Lee Harvey Oswald and the substitution and fabrication of every single piece of evidence It discusses the role played in the murder by some of the most powerful men in the country Lyndon Johnson J Edgar Hoover and Richard Nixon as well as the rich oil men and companies who backed them It then describes the cover ups by the media the major investigations over the years the FBI and the mind control cooperation at work in the case to misdirect researchers and the public The book describes in great detail the people and companies in Texas who planned and carried out the assassination It names names One recent investigation in the 90s followed Mr Livingstone s preceeding work and reinvestigated with the witnesses both he and the official investigations had talked to but this time took into consideration their documentation and what they had actually said and in a chapter this is his stunning new evidence from the U S government under President Clinton that is blowing the lid off the case Mr Livingstone first revealed to the Washington press corps in 1998 that there has been such a secret investigation and spoke for fifty minutes when the Assassination Records Review Board gave their final press conference As a result Mr Livingstone was on all major TV networks and on the Today show NBC with Katie Couric the next morning The book also contains the

story of Dallas doctor Charles Crenshaw's law suit and the depositions of the editor and writer of the Journal of American Medical Association who libeled him in articles in 1992 Dr Crenshaw's book about trying to save Kennedy at Parkland Hospital shortly after the shooting came out on the same day as Mr Livingstone's major work on the medical evidence High Treason 2 were JAMA's targets and the depositions contain much discussion of Mr Livingstone's major impact on the JFK case This new book is to be followed closely by a sixth book entirely about the Zapruder film called The Hoax of the Century Decoding the Forgery of the Zapruder Film

Conspiracy Encyclopedia Thom Burnett, 2006 Conspiracies are everywhere they are the lifeblood of politics business and our daily lives this truly international and all embracing encyclopedia explains the details of the world's major popular conspiracies listing them chronologically under subject matter and cross referencing them continually because so many conspiracy theories interact on some level Conspiracies are often international in their sweep and their impact the brutal stabbing of Julius Caesar the conspiracy which has defined political assassinations ever since plunged the Roman Empire into civil war which then engulfed much of the known western world More recently the Cambridge spies Philby Blunt MacLean and Burgess helped Russia throughout WWII and then re defined the Cold War afterwards Philby's defection casting a 30 year shadow over CIA Anglo American relations though conspiracies define our everyday lives there is no body of serious academic research to understand their role nature or defining characteristics Most historians prefer to adhere to the cock up theory of history in which everything happens by accident or incompetence Although this view is favoured by academics and historians it is rejected by a large part of the general public who prefer the evidence of their own lives However they consume their media what they see is a mesh of conspiracies that define the texture of their everyday lives often for the worst Most people believe that there is a grain of truth in most theories about conspiracies this book is for them

In the Name of Science Andrew Goliszek, 2003-11-15 Science as Andrew Goliszek proves in this compendious chilling and eye opening book has always had its dark side Behind the bright promise of life saving vaccines and life enhancing technologies lies the true cost of the efforts to develop them Knowledge has a price often that price has been human suffering The ethical limits governing use of the human body in experimentation have been breached redefined and breached again from the moment the first plague ridden corpse was heaved over the fortifications of a besieged medieval city to the use of cutting edge gene therapy today Those limits are in constant need of redefinition for the goals and the techniques have become both more refined and more secretive The German and Japanese human experiments of the 1930s and 1940s horrified the world when they came to light These barbaric exercises in pseudoscience grew out of assumptions of racial superiority The subjects were deemed subhuman ordinary guidelines could therefore be suspended What has happened in the decades since World War II has differed only in degree Explicitly or implicitly any organization or government that undertakes or sponsors scientific research applies some measure of human worth Experimentation rests upon an equation that balances suffering against gain the good of the collective against the rights of

the individual and the risk of unknown consequences against the rewards of scientific discovery Everything depends upon who makes that equation The sobering and gripping accumulation of evidence in this book proves exactly what has been justified in the name of science The science of eugenics justified enforced sterilization The need to gain an upper hand in the Cold War justified CIA experiments involving mind control and drugs The desperate race to control nuclear proliferation was used to justify radiation experiments whose effects are still being felt today Chemical warfare gene therapy molecular medicine These subjects dominate headlines and even direct our government's foreign policy yet the whole truth about the experimentation behind them has never been made public Though not a cheering book *In the Name of Science* is a crucially important one and it deserves a wide audience A biologist by training Goliszek presents each topic clearly and explains fully its significance and implications Connecting the history of scientific experimentation through time with the topics that are likely to dominate the future he has performed an invaluable service No other book on the market provides the research included here or presents it with such persuasive force **American Intelligence, 1775-1990** Neal H. Petersen, 1992
