volume contains a selection of manuscripts of lectures presented at the International Symposium on Operations Research SOR 96. The Symposium took place at the Technical University of Braunschweig September 3-6 1996. SOR 96 was organized under the auspices of the two German societies of Operations Research Deutsche Gesellschaft für Operations Research DGOR and Gesellschaft für Mathematik Ökonomie and Operations Research GMOOR in cooperation with the Working Group Discrete Optimization of the IFIP WG7.4. Since 1995 DGOR and GMOOR jointly prepare the Symposium as a common annual conference. In particular the annual general meetings of the DGOR the GMOOR and the WG7.4 took place during the conference. The Symposium had 527 participants from 32 countries around the world including 92 participants from Eastern Europe. The Symposium obviously attracts an international audience of workers fully covering the broad spectrum of Operations Research and related areas in economics mathematics and computer science. The importance of a highly interdisciplinary field as Operations Research is increasing owing to the growth in applications in related disciplines. Technological advances in computer science and algorithmic mathematics are crucial for attacking the great challenges waiting in the areas of applications of Operations Research effectively. Operations Research Proceedings 2003 Dino Ahr, Roland Fahrion, Marcus Oswald, Gerhard Reinelt, 2004-05-05. This volume contains a selection of papers referring to lectures presented at the symposium Operations Research 2003 OR03 held at the Ruprecht Karls Universität Heidelberg September 3-5 2003. This international conference took place under the auspices of the German Operations Research Society GOR and of Dr Erwin Teufel prime minister of Baden Württemberg. The symposium had about 500 participants from countries all over the world. It attracted academicians and practitioners working in various fields of Operations Research and provided them with the most recent advances in Operations Research and related areas in Economics Mathematics and Computer Science. The program consisted of 4 plenary and 13 semi-plenary talks and more than 300 contributed papers selected by the program committee to be presented in 17 sections. Due to a limited number of pages available for the proceedings volume the length of each article as well as the total number of accepted contributions had to be restricted. Submitted manuscripts have therefore been reviewed and 62 of them have been selected for publication. This refereeing procedure has been strongly supported by the section chairmen and we would like to express our gratitude to them. Finally we also would like to thank Dr Werner Müller from Springer Verlag for his support in publishing this proceedings volume.

This proceedings volume contains a selection of papers presented at the OR 98 conference that was held at the Swiss Federal Institute of Technology ETH in Zurich from August 31 to September 3, 1998. The selection of papers included in this volume reflects well the number of papers in the corresponding sections at the conference. Thus we observe that the intellectual mainstream in Operations Research still is mathematical optimization and its application in logistics and transportation systems. In addition to these traditional areas the conference emphasized the potential contributions of Operations Research in the new challenging area of system design and management in the liberalized energy and telecommunication markets. Operations Research Proceedings 2006 Karl-Heinz Waldmann, Ulrike M. Stocker, 2007-05-07. This volume contains a selection of papers referring to lectures presented at the symposium Operations Research 2006 held at the University of Karlsruhe. The symposium presented the state of the art in Operations Research and related areas in Economics, Mathematics and Computer Science and demonstrated the broad applicability of its core themes, placing particular emphasis on Basel II, one of the most topical challenges of Operations Research.

Operations Research Proceedings 1994 Ulrich Derigs, Achim Bachem, Andreas Drexl, 2012-12-06. An insight into the latest results from the world of operations research, a wide ranging field as is shown by the book's 24 sections corresponding to the conference program itself. Although problems of a primarily methodological nature are discussed, the emphasis is placed firmly on practical subjects such as reports from the fields of healthcare, environmental protection, logistics and traffic engineering. This selection also clearly illustrates the extent to which OR is spreading into and already interwoven in other scientific disciplines. **Operations Research Proceedings 2002** Ulrike Leopold-Wildburger, Franz Rendl, Gerhard Wäscher, 2012-12-06.
