## **Operative Rights:**

**Operative Rights** Beth J. Singer, 1993-09-06 This book was written because none of the more traditional theories accurately portray the way rights including individual rights actually function It develops a theory of rights that challenges the individualism of the human rights tradition and ascribes rights to collectivities as well as to individuals Drawing in part on the thought of George Herbert Mead Singer develops an analysis of rights as social institutions Integral to this analysis is a theory of community and a related theory of the self that utilize insights derived from both Mead and Justus Buchler Singer shows on the one hand how communities ranging from small groups to ethnic minorities to nations as well as individuals can have rights and on the other why nonhuman animals cannot Contending that rights exist only where they are actually operative within and among communities she identifies fundamental rights that ought to be operative in and for every community In addition to discussing aspects of major contemporary rights theories Singer deals with current issues such as that of fetal rights and with a variety of examples the problem of conflicts of rights including conflicts between the rights of communities and those of their members Pragmatism, Rights, and Democracy Beth J. Singer, 2018-09-18 Singer's theory of rights an impressive development of social accounts by pragmatists George Herbert Mead and John Dewey was developed in *Operative Rights* 1993 This successor volume includes applications lectures replies to critics and clarifications For Singer Dewey and Mead rights exist only if they are embedded in the operative practices of a community People have a right in a community if their claim is acknowledged and if they would acknowledge similar claims by others Singer's account contrasts with theories of natural rights which state that humans have rights by virtue of being human Singer's account also differs from Kantian attempts to derive rights from the necessary conditions of rationality While denying that rights exist independently of a community's practices Singer maintains that rights to personal autonomy and authority ought to exist in all communities Group rights an anathema among individualistic theories are from Singer's pragmatist perspective a valuable institution Singer's discussion of rights appropriate for minority communities e g the Bosnian Muslims and the Canadian Quebecois is particularly illuminating Her book is a model of careful reasoning General libraries and certainly academic libraries should have Singer's *Operative Rights* The volume under review is a good addition for research libraries and recommended for graduate students and above Singer examines the views of Rousseau Mill and T H Green on human rights and those of Dewey and G H Mead on the relationship between rights and the democratic process Recommended Choice

Zinnos, 2007 Human rights refers to the concept of human beings as having universal rights or status regardless of legal jurisdiction and likewise other localising factors such as ethnicity and nationality For many the concept of human rights is based in religious principles However because a formal concept of human rights has not been universally accepted the term has some degree of variance between its use in different local jurisdictions difference in both meaningful substance as well as in protocols for and styles of application Ultimately the most general meaning of the term is one which can only apply universally and hence the term

human rights is often itself an appeal to such transcended principles without basing such on existing legal concepts The term humanism refers to the developing doctrine of such universally applicable values and it is on the basic concept that human beings have innate rights that more specific local legal concepts are often based Within particular societies human rights refers to standards of behaviour as accepted within their respective legal systems regarding 1 the well being of individuals 2 the freedom and autonomy of individuals and 3 the representation of the human interest in government These rights commonly include the right to life the right to an adequate standard of living the prohibition of genocide freedom from torture and other mistreatment freedom of expression freedom of movement the right to self determination the right to education and the right to participation in cultural and political life These norms are based on the legal and political traditions of United Nations member states and are incorporated into international human rights instruments This new book brings together the latest book literature centred on this crucial topic

Religious Schools v. Children's Rights James G. Dwyer, 2018-08-06 Despair over the reported inadequacies of public education leads many people to consider religious schools as an alternative James G Dwyer demonstrates however that religious schooling is almost completely unregulated and that common pedagogical practices in fundamentalist Christian and Catholic schools may be damaging to children He presents evidence of excessive restriction of children's basic liberties stifling of intellectual development the instilling of

dogmatic and intolerant attitudes as well as the infliction of psychological and emotional harms including excessive guilt and repression and especially among girls diminished self esteem Courts legal and political theorists and the public typically argue that families and religious communities are entitled to raise their children as they see fit and that the state must remain neutral on religious matters Dwyer proposes an alternative framework for state policy regarding religious schooling and other child rearing practices urging that the focus always be on what is best from a secular perspective for the affected children He argues that the children who attend religious schools have a right to adequate state regulation and oversight of their education States are obligated to ensure that such schools do not engage in harmful practices and that they provide their students with the training necessary for pursuit of a broad range of careers and for full citizenship in a pluralistic democratic society
