Kelsey,2012-12-06 The research workers at the Eye Clinic of the Medical Academy of Erfurt are proud of having been entrusted for the second time with the organization of the yearly ISCEV symposium Twelve years ago the 6th Symposium was held in Erfurt This time we turned to Reinhardsbrunn an old castle situated in the vicinity of Erfurt on the fringes of the wonderful mountainscape of the Thuringian Forest Reinhardsbrunn castle serves today as a holiday hotel and convention place It seemed to us to be the right place for carrying on the discussions in a comfortable and informal way after the actual sessions were over Comparing the scientific reports read at the 6th and 17th Symposium both organized in Erfurt one readily becomes aware of the impressive advances in our rapidly developing field of interest The technical and more specifically the electronic advancements have been enormous especially in the field of recording and processing the visually evoked cortical potentials Adually the addition of this special field of study to our realm led to the renaming of the Society some years ago Moreover it became more and more obvious that interdisciplinary cooperation between ophthalmologists physiologists physi cists technologists and mathematicians is essential This is also reflected in the composition of our membership      *Techniques in Clinical Electrophysiology of Vision* G. Sears,2012-12-06 Roots of the theory and practice of ocular pharmacology may be traced to the ancient Mesopotamian code of Hammurabi and then to several papyri reflecting the clinical interests of the Egyptians The evolution of its art and science was irregularly paced until the nineteenth century when Kohler in 1884 proved the anesthetic effect of cocaine on the cornea and when Fraser Laquer Schmiedeberg Meyer and others studied the pharmacology of the autonomic nervous system by way of observations of the pupil Advances in the past few decades have been nothing short of explosive How can the student physician or basic research scientist stay in touch with these electrifying studies To help with the answer to this question the authors set as their goal the development of increased understanding so that the student research scientist and ophthalmologist can cope with the latest discoveries The authors want to narrow what appears to be an ever increasing gap between basic science and ophthalmology The basic aspects of pharmacology have been presented in light of the natural physiology In this regard while distinctions among endogenous mechanisms drug effects and the pathogenesis of disease are to be separately recognized appreciation must be given to the concept that both the desirable and unwanted manifestations or functions caused by either disease or drugs must very often represent a quantitative change in normal metabolic pathways

Macular Edema Thomas J. Wolfensberger,2012-12-06 This timely publication fills a large gap in the ophthalmic literature which has so far lacked a monograph on the clinically very important subject of macular edema The book presents the most up to date scientific concepts concerning the etiology and pathogenesis of blood retinal barrier breakdown such as tight junction associated protein dysfunction and changes in fluid transport properties of the retinal pigment epithelium The bulk of the book is clinically oriented and addresses novel imaging and diagnostic techniques for the detection of macular edema as well as the clinical context of a panoply of ocular diseases which induce macular edema such as diabetes other vasculopathies uveitis and many others New light is shed on the association between highly active antiretroviral therapy and the induction of macular edema in HIV positive patients Novel drug treatment regimens with steroids and carbonic anhydrase inhibitors as well as new ways of applying laser and surgical therapies are also discussed in detail and practical treatment guidelines are given This book will be helpful for vitreoretinal specialists as well as for the practising ophthalmologist confronted with patients suffering from macular edema *Advances in Ophthalmology and Optometry* , E-Book 2020 Myron Yanoff,2020-08-28 *Advances in Ophthalmology and Optometry* reviews the most current practices in both ophthalmology and optometry A distinguished editorial board headed by Dr Myron Yanoff identifies key areas of major
