Convergence National Research Council,Division on Earth and Life Studies,Board on Life Sciences,Committee on Key Challenge Areas for Convergence and Health,2014-06-16 Convergence of the life sciences with fields including physical chemical mathematical computational engineering and social sciences is a key strategy to tackle complex challenges and achieve new and innovative solutions However institutions face a lack of guidance on how to establish effective programs what challenges they are likely to encounter and what strategies other organizations have used to address the issues that arise This advice is needed to harness the excitement generated by the concept of convergence and channel it into the policies structures and networks that will enable it to realize its goals Convergence investigates examples of organizations that have established mechanisms to support convergent research This report discusses details of current programs how organizations have chosen to measure success and what has worked and not worked in varied settings The report summarizes the lessons learned and provides organizations with strategies to tackle practical needs and implementation challenges in areas such as infrastructure student education and training faculty advancement and inter institutional partnerships **Monthly Catalog of United States Government Publications** ,1994 **Future Biotechnology**

Research on the International Space Station National Research Council,Commission on Physical Sciences, Mathematics, and Applications,Space Studies Board,Task Group for the Evaluation of NASA's Biotechnology Facility for the International Space Station,2000-05-14 Under current NASA plans investigations in the area of biotechnology will be a significant component of the life sciences research to be conducted on the International Space Station ISS They encompass work on cell science and studies of the use of microgravity to grow high quality protein crystals Both these subdisciplines are advancing rapidly in terrestrial laboratories fueled by federal and industrial research budgets that dwarf those of NASA s life science program Forging strong and fruitful connections between the space investigations and laboratory bench biologists a continual challenge for NASA s life sciences program is thus of great importance to ensuring the excellence of ISS research This report evaluates the plan for NASA s biotechnology facility on the ISS and the scientific context that surrounds it and

makes recommendations on how the facility can be made more effective In addition to questions about optimizing the instrumentation the report addresses strategies for enhancing the scientific impact and improving the outreach to mainstream terrestrial biology No major redirection of effort is called for but collectively the specific targeted changes recommended by the task group would have a major effect on the conduct of biotechnology research in space
