Arya, George D. Verros, J. Paulo Davim, 2024-10-08 Understand functional coatings and their role in three key industries of the future Functional coatings play a huge range of roles in industries from automotive to aerospace to electronic and beyond They offer protection performance enhancement corrosion resistance self cleaning properties and more Recent developments in the field have allowed for ever more precise optimization of functional coatings with the result that demand for these key tools is only likely to increase Functional Coatings for Biomedical Energy and Environmental Applications offers a comprehensive overview of these coatings and their applications in three explosively

productive industries A team of expert contributors provides chapters analyzing the latest developments in this growing area of production with a particular focus on the dynamic relationship between functional coatings and their many applications The result is an interdisciplinary text which will serve as an essential resource for researchers and industry professionals worldwide Readers will also find Analysis of functional coatings for dental implants pool boilers solar cells and many more Detailed discussion of coating properties including superhydrophobicity self cleaning controlled drug release and more Key contributions to the great environmental challenges of the twenty first century This book is a must own for researchers in chemistry engineering energy materials science and more as well as for industry professionals working with coating and other aspects of research and development in biomedical energy or environmental industries **Electromagnetic Optics**

**of Thin-Film Coatings** Claude Amra, Michel Lequime, Myriam Zerrad, 2021-01-14 Three experts in the field of thin film optics present a detailed and self contained theoretical study of planar multilayers and how they can be effectively exploited in both traditional and modern applications Starting with a discussion of the relevant electromagnetic optics the fundamental optical properties of multilayers are introduced using an electromagnetic approach based on a direct solving of Maxwell s equations by Fourier transforms This powerful approach is illustrated through the comprehensive description of two of the most important phenomena in multilayers i e giant field enhancement in dielectric stacks and light scattering from thin film optical filters The same approach is extended to the description of the operation of planar microcavities and the balance of energy between radiated and trapped light This book will be valuable to researchers engineers and graduate students with interests in nanophotonics optical telecommunications observational astronomy and gravitational wave detection Thin Films on Glass Hans Bach, Dieter Krause, 2013-03-09 This book entitled Thin Films on Glass is one of a series reporting on research and development activities on products and processes conducted by the Schott Group The scientifically founded development of new products and technical processes has traditionally been of vital importance to Schott and has always been performed on a scale determined by the prospects for application of our special glasses Since the reconstruction of the Schott Glaswerke in Mainz the scale has increased enormously The range of expert knowledge required could never have been supplied by Schott alone It is also a tradition in our company to cultivate collaboration with customers universities and research institutes Publications in numerous technical journals which since 1969 we have edited to a regular schedule as Forschungsberichte research reports describe the results of these cooperations They contain up to date information on various topics for the expert but are not suited as survey material for those whose standpoint is more remote This is the point where we would like to place our series to stimulate the exchange of thoughts so that we can consider from different points of view the possibilities offered by those incredibly versatile materials glass and glass ceramics We would like to share the knowledge won through our research and development at Schott in cooperation with the users of our materials with scientists and engineers interested customers and friends and with the employees of our firm **Optics Manufacturing**
