Optical Design Materials Fabrication And Maintenance:

Optical Design, Materials, Fabrication, and Maintenance ,2000 Developing Basic Space Science World-Wide Willem Wamsteker,Rudolf Albrecht,Hans J. Haubold,2005-12-28 J Andersen Niels Bohr Institute for Astronomy Physics and Geophysics Astronomical Observatory Copenhagen ja astro ku dk The development of astronomy worldwide begins at the roots Already from childhood humans of all nations and civilizations seem to share an innate fascination with the sky Yet people in different regions of the world have vastly different possibilities for pursuing this interest In wealthy industrialised societies the way is open to a school or higher education in science possibly leading to a career in astronomy or basic or applied space science for the benefit of the country as well as the individual In other regions neither the financial nor the trained human resources are sufficient to offer that avenue to the future of the young generation or those intellectual resources to the development of their country This book addresses ways and means by which these obstacles can be if not fully overcome then at least significantly reduced **Journal of the Optical Society of America** ,2002 **Astronomical Optics and Elasticity Theory** Gérard René Lemaitre,2008-12-04 Astronomical Optics and Elasticity Theory provides a very thorough and comprehensive account of what is known in this field After an extensive introduction to optics and elasticity the book discusses variable curvature and multimode deformable mirrors as well as in depth active optics its theory and applications Further optical design utilizing the Schmidt concept and various types of Schmidt correctors as well as the elasticity theory of thin plates and shells are elaborated upon Several active optics methods are developed for obtaining aberration corrected diffraction gratings Further a weakly conical shell theory of elasticity is elaborated for the aspherization of grazing incidence telescope mirrors The very didactic and fairly easy to read presentation of the topic will enable PhD students and young researchers to actively participate in challenging astronomical optics and instrumentation projects
