Shaw-Miller,2017-07-05 **Eye hEar The Visual in Music** employs the concept of the visual in proximate relation to music producing a tension is it not the case that there is a gulf between painting and music between the visible and the audible One is full of colour and light yet silent one is invisible and marvellously noisy Such a belief this book argues betrays an ideological constraint on music desiccating it to sound and art to vision The starting point of this study is more hybrid and

hydrating that music is never employed without numerous and complex intersections with the visual By involving the concept of synaesthesia the book evokes music's multi sensory nature stops it from sounding alone and offers music as a subject for art historians Music bleeds into art and visuality in its graphic depiction in notation in the theatre of performance its sights and sites This book looks at music in its absolute guise as a model for art at notation and the conductor as the silent visual fulcrum around which music circulates at the music and image of Erik Satie at the concert hall as white cube at the symphonic film 2001 A Space Odyssey and at the liminality of John Cage and Andy Warhol

The Aesthetics of Matter Sarah Posman, Anne Reverseau, David Ayers, Sascha Bru, Benedikt Hjartarson, 2013-10-29 It has often been argued that the arrival of the early 20th century avant gardes and modernisms coincided with an in depth exploration of the materiality of art and writing The European historical avant gardes and modernisms excelled in their attempts to establish the specificity of media and art forms as well as in experimenting with the hybridity of the materials of their multiple disciplines This third volume of the series European Avant Garde and Modernism Studies sheds light on the full range and import of this aspect in avant garde and modernist aesthetics across all art forms and throughout the 19th and 20th centuries The book's contributions written by experts from some 20 countries seek to answer the following questions What sort of objects and material works and media help us to properly grasp the avant garde and modernist aesthetics of matter How were affects emotions and sensory and bodily experiences transferred and transformed in the experiment with matter How were immaterial things such as concepts of time changed in this aesthetic moment What material meanings were disseminated in the cultural transfer and translation of objects How did subsequent avant gardes deal with the aesthetics of matter in their response to historical predecessors

Wednesday Is Indigo Blue Richard E. Cytowic, David M. Eagleman, 2011-09-30 How the extraordinary multisensory phenomenon of synesthesia has changed our traditional view of the brain A person with synesthesia might feel the flavor of food on her fingertips sense the letter J as shimmering magenta or the number 5 as emerald green hear and taste her husband's voice as buttery golden brown Synesthetes rarely talk about their peculiar sensory gift believing either that everyone else senses the world exactly as they do or that no one else does Yet synesthesia occurs in one in twenty people and is even more common among artists One famous synesthete was novelist Vladimir Nabokov who insisted as a toddler that the colors on his wooden alphabet blocks were all wrong His mother understood exactly what he meant because she too had synesthesia Nabokov's

son Dmitri who recounts this tale in the afterword to this book is also a synesthete further illustrating how synesthesia runs in families In Wednesday Is Indigo Blue pioneering researcher Richard Cytowic and distinguished neuroscientist David Eagleman explain the neuroscience and genetics behind synesthesia s multisensory experiences Because synesthesia contradicted existing theory Cytowic spent twenty years persuading colleagues that it was a real and important brain phenomenon rather than a mere curiosity Today scientists in fifteen countries are exploring synesthesia and how it is changing the traditional view of how the brain works Cytowic and Eagleman argue that perception is already multisensory though for most of us its multiple dimensions exist beyond the reach of consciousness Reality they point out is more subjective than most people realize No mere curiosity synesthesia is a window on the mind and brain highlighting the amazing differences in the way people see the world
