Monthly Catalog of United States Government Publications ,2000 *The Life and Death of International Treaties* Jeffrey S. Lantis,2009 This book represents one of the first comparative studies of international treaty ratification processes in multiple issue areas It employs the comparative case study method drawing on original research elite interviews and discursive analyses of government documents in Europe Australia and North America *Congressional Quarterly Weekly Report* ,1997-04 **Retrenchment in the American Welfare State** Martin Schuldes,2011 The consolidation of public finance has become the most prevalent topic in recent policy discourse in the US However the political debate about fiscal belt tightening stretches back to the last decades of the past millennium induced by deteriorating economic conditions which followed the first oil price shock in the early 1970s Retrenchment in the American Welfare State investigates to what extent different welfare state programs in the US were affected by cutbacks during the Republican Reagan era on the one hand and during the Democratic Clinton era on the other and to what extent these cutbacks reveal certain patterns of retrenchment and how the measured discrepancies can best be explained Series Studies in North American History Politics and Society Studien zu Geschichte Politik und Gesellschaft Nordamerikas Vol 30 **Impeaching Clinton** Nicol C. Rae,Colton C. Campbell,2004 Analysis of the impeachment and portrayal of the partisan and ideologically polarized state of American politics at the turn of the century Argues that the battle was not over Clinton but over control of the policy agenda back cover

The Armies of East Asia Dennis Van Vranken Hickey,2001 The end of the 1980s and the beginning of the 1990s have been a time of great change for academic libraries and librarians Rapid developments in technology have revolutionized the libraries means and mission while declining budgets have adversely impacted the ability of librarians to carry out their roles The literature of academic librarianship today reflects these changes and points to the direction in which academic libraries are headed This book is a comprehensive guide to book chapters and articles written on academic librarianship between 1990 and 1993 Entries for nearly 1 700 works are grouped in six topical chapters for ease of use Each entry includes an informative annotation that summarizes the key points made by the authors the major findings of research projects and the names and locations of libraries with innovative programs Extensive author article book journal title and subject indexes conclude the work The volume is a useful tool for locating specific information on various topics and it is a forecast of the future of academic libraries **US-China Relations** Tao Xie,2008-09-05 With China s rapid ascendance to great power status the U S China relationship has become one of the most important international relationships in the world today This book explores relations between the U S and China focusing in particular on China policymaking in the U S Congress which has been unusually active in the development of this relationship Based on detailed analysis of China bills introduced in Congress over the past three decades it provides detailed analysis of how Congressional policymaking works in practice and explores the most controversial issues in U S China relations Taiwan trade and human rights It considers the voting patterns

and party divisions on these issues showing that liberals and conservatives often form an alliance concerning China because China's authoritarian regime, human rights problems, soaring trade surplus with the U.S. and rising military power attract criticism from both camps. It also argues that congressional committees, bicameralism and presidential veto make it virtually impossible for Congress to legislate on China despite its intense preferences and therefore Congress often turns to informal but no less effective means to exert influence on China policy such as framing public opinion and generating situations that result in anticipated reactions by the executive branch or Beijing.

The United States, India and the Global Nuclear Order Tanvi Pate, 2018-06-13 In the Post Cold War era US nuclear foreign policies towards India witnessed a major turnaround as a demand for cap reduce eliminate under the Clinton administration was replaced by the implementation of the historic civil nuclear deal in 2008 by Bush a policy which continued under Obama's administration. This book addresses the change in US nuclear foreign policy by focusing on three core categories of identity inequality and great power narratives. Building upon the theoretical paradigm of critical constructivism the concept of the state is problematised by focusing on identity related questions arguing that the state becomes a constructed entity standing as valid only within relations of identity and difference. Focusing on postcolonial principles Pate argues that imperialism as an organising principle of identity difference enables us to understand how difference was maintained in unequal terms through US nuclear foreign policy. This manifested in five great power narratives constructed around peace and justice India Pakistan deterrence democracy economic progress and scientific development. Identities of race political economy and gender in terms of radical otherness and otherness were recurrently utilised through these narratives to maintain a difference enabling the respective administrations to maintain US identity as a progressive and developed western nation intrinsically justifying the US role as an arbiter of the global nuclear order. A useful work for scholars researching identity construction and US foreign and security policies. US India bilateral nuclear relations South Asian nuclear politics critical security and postcolonial studies.

Encyclopedia of Social Work, 1965 *The Caspian Sea* William Ascher, Natalia Mirovitskaya, 2012-12-06 This volume is based on the presentations and deliberations of an Advanced Research Workshop ARW Caspian Sea A Quest for Environmental Security that was held on March 15-19 1999 in Venice Italy. The Workshop was sponsored by the NATO's Division for Scientific and Environmental Affairs with additional support provided by the Trust for Mutual Understanding USA. It was organized by Duke University's Center for International Development Research with the guidance of the International Committee of scientists from Russia United States Georgia and Italy and organizational assistance rendered by Venice International University. The Caspian Sea region is of profound importance from the perspective of global and regional

environmental security New geopolitical and economic circumstances have created a mixture of competition reluctant collaboration and legal political economic and ideological wrangling There is an intense debate over how the Caspian and its resources should be divided among littoral states and how these resources are to be developed While most littoral states and the international companies strive to develop the area s immense hydrocarbon potential it is clear that the Caspian s unique and fragile ecosystem is at risk

Trading with the Enemy Hugo Meijer,2016-02-02 In light of the intertwining logics of military competition and economic interdependence at play in US China relations *Trading with the Enemy* examines how the United States has balanced its potentially conflicting national security and economic interests in its relationship with the People s Republic of China PRC To do so Hugo Meijer investigates a strategically sensitive yet under explored facet of US China relations the making of American export control policy on military related technology transfers to China since 1979 *Trading with the Enemy* is the first monograph on this dimension of the US China relationship in the post Cold War Based on 199 interviews declassified documents and diplomatic cables leaked by Wikileaks two major findings emerge from this book First the US is no longer able to apply a strategy of military technology containment of China in the same way it did with the Soviet Union during the Cold War This is because of the erosion of its capacity to restrict the transfer of military related technology to the PRC Secondly a growing number of actors in Washington have reassessed the nexus between national security and economic interests at stake in the US China relationship by moving beyond the Cold War trade off between the two in order to maintain American military preeminence vis vis its strategic rivals By focusing on how states manage the heterogeneous and potentially competing security and economic interests at stake in a bilateral relationship this book seeks to shed light on the evolving character of interstate rivalry in a globalized economy where rivals in the military realm are also economically interdependent

Foreign Policy of the United States Ernest Simone,2000 Foreign policy of the United States is a complex mechanism defined both by constitutional law as well as by various instruments of public and private pressure This book examines first of all the foreign policy roles of the President and Congress History has shown control of foreign policy has shifted between the Executive Branch and Congress depending on public opinion perceived strengths of various presidents congressional interest levels and willingness of power congressmen to oppose the president National interest as a

foreign policy element is considered as well. Albeit a vague term that can and often is construed to mean whatever a particular president or congress is interested in the moment there are several areas of general agreement: cheap oil for American consumers, halting nuclear proliferation, containment of Russia, following Israeli direction on Mid East policy, trying to open Chinese markets for American companies, generally serving as an active agent of American business in global markets, maintaining and projecting American's military muscle throughout the world. The book also examines the government organisations involved in foreign policy, the laws related to various countries, foreign election monitoring, economic sanctions as instruments of foreign policy, international terrorism and the War Powers Resolution.

Gender and American Politics Sue Tolleson-Rinehart, Jyl J. Josephson, 2000. Gender matters in American politics sometimes in obvious ways and sometimes in ways rarely noticed. As manifested in the gender gap it inflects political attitudes and behaviors resulting in distinctive patterns of difference and similarity in the opinions and voting behavior of men and women. It plays a role in public policy decision making on a wide range of issues not only those related to reproduction and health. Finally and sometimes very subtly gender and gendered assumptions influence the operation of governmental institutions from the cabinet to Congress to the courtroom and the ways those institutions are changing over time. This path breaking collection of original essays systematically explores the roles of gender in American political life: how men and women are politically the same and politically different in their attitudes and actions. Among the topics covered are political knowledge, moral decision making, patterns of participation, taxation, gender in policy debates, social policy, health policy, and women in the cabinet, the Congress and the judiciary.

America, the EU and Strategic Culture Asle Toje, 2008-01-31. This book examines transatlantic security relations after the Cold War and how this has influenced the development of an EU strategic culture.

New Directions in American Politics Raymond J. La Raja, 2013-02-15. New Directions in American Politics introduces students not just to how the American political system works but also to how political science works. La Raja brings together top scholars to write original essays across the standard curriculum of American government and politics, capturing emerging research in the discipline in a way that is accessible for undergraduates. Each chapter combines substantive knowledge with the kind of skill building and analytical inquiry that is being touted in higher education everywhere. Contributors to New Directions highlight why the questions they seek to answer are critical for understanding American politics and situate them in the broader context of controversies in research. The teaching of American politics follows a well worn path. Textbooks for introductory courses hew to a traditional set of chapters that describe the Founding, American institutions, the ways citizens participate in politics, and sometimes public policy. The material rarely engages students in the kind of questions that animate scholarship on politics. One hurdle for instructors is finding material that reflects quality scholarship and thus teaches students about why, not just what, and yet is accessible for undergraduates. Articles in scholarly journals are typically unsuited for undergraduate courses, particularly introductory courses. What is needed is a book that conveys exciting trends in

scholarship across vital topics in American politics and illustrates analytical thinking New Directions in American Politics is that book and will be an ideal companion to standard textbooks that focus mostly on nuts and bolts of politics The book features Contributions from a top notch cast of active scholars and a highly regarded editor A focus on analytical thinking that addresses questions of causality Full coverage of the American politics curriculum Short interviews with each contributor on a companion website to help the research come alive and prompt critical thinking questions for students Work that draws on the highest quality research in political science but is written specifically for first year undergraduate students There is simply no book like this available to the growing number of faculty who want their introductory American politics course to be a reflection of the political science discipline and not just the nuts and bolt facts of the American political system
