Poor People's Politics Javier Auyero, 2001 Examines how Argentina's urban poor use political networks and informal webs of reciprocal help to solve their everyday survival needs

Rich Democracies, Poor People David Brady, 2009-08-13 Poverty is not simply the result of an individual's characteristics, behaviors or abilities. Rather, as David Brady demonstrates, poverty is the result of politics. In *Rich Democracies, Poor People*, Brady investigates why poverty is so entrenched in some affluent democracies whereas it is a solvable problem in others. Drawing on over thirty years of data from eighteen countries, Brady argues that cross-national and historical variations in poverty are principally driven by differences in the generosity of the welfare state. An explicit challenge to mainstream views of poverty as an inescapable outcome of individual failings or a society's labor markets and demography, this book offers institutionalized power relations theory as an alternative explanation.

The Politics of the Poor in Contemporary India Indrajit Roy, 2018-02 Based on diverse sorts of data and fieldwork in India, this book analyses how the poor participate in a democracy.

Making services work for poor people World Bank, *Taking action for the world's poor and hungry people: Synopsis of an international consultation* Joachim von Braun, Rajul Pandya-Lorch, 2007 Presents the main findings and highlights of the discussions at the IFPRI facilitated conference Taking Action for the World's Poor and Hungry People held October 17-19, 2007 in Beijing.

The Faces of Authoritarianism and Strategies of Dissent in Contemporary Brazil Andreza Aruska de Souza Santos, Katerina Hatzikidi, 2025-05-15 Rather than looking back into Brazil's authoritarian past, the Bolsonaro administration (2019-2022) provides an innovative case study through which to explore Brazil's manifold and recurring expressions of authoritarianism. This book investigates the ways that authoritarianism most recently emerged and how it was confronted and, in doing so, the varied ways and spaces in which struggles over the meaning and practice of democracy took place during the period. *The Faces of Authoritarianism and Strategies of Dissent in Contemporary Brazil* examines repression and dissent efforts to dismantle democratic foundations alongside forms of contestation and resistance to authoritarianism. The chapters offer valuable theoretical and ethnographic insights from interdisciplinary perspectives into the complex realities that Brazilians experienced in the four years of Bolsonaro's presidency. The book is organised around four sections, each addressing a core area where democracy as meaning and practice was contested, attacked and defended. This is shown not only between Bolsonaro's government and those who resisted it from within and outside the state, but also between state and non-state actors and between public and private sectors, allowing for a broad view of the country's polarised political landscape and the impact such struggles have had on civil society. Praise for *The Faces of Authoritarianism and Strategies of Dissent in Contemporary Brazil*: An extraordinary analysis of how Brazil's far right built cultural hegemony before seizing institutional power. It unpacks both the circumstances and the structures behind this rise and crucially shows that the battle is far from over. A vital lens on contemporary global politics. Gabriel Feltran, Centre for European Studies and Comparative Politics.

Sciences Po Paris Bringing together diverse interdisciplinary perspectives this book offers a timely exploration of Brazil's recent political experiences with authoritarianism and resistance making it essential reading for those concerned with democracy's future in Brazil and beyond Malu A C Gatto UCL A timely contribution that explores not only the rise of right wing authoritarianism in Brazil but different forms of resistance that have emerged from efforts to push back This is an important book that paints a sobering picture of how democracy is under threat in contemporary Brazil Dr Jeff Garmany University of Melbourne

The Politics of Representation in the Global Age Peter A. Hall, Wade Jacoby, Jonah Levy, Sophie Meunier, 2014-04-07 How has the process of political representation changed in the era of globalization The representation of interests is at the heart of democracy but how is it that some interests secure a strong voice while others do not While each person has multiple interests linked to different dimensions of his or her identity much of the existing academic literature assumes that interests are given prior to politics by a person's socioeconomic institutional or cultural situation This book mounts a radical challenge to this view arguing that interests are actively forged through processes of politics The book develops an analytic framework for understanding how representation takes place based on processes of identification mobilization and adjudication and explores how these processes have evolved over time Through a wide variety of case studies the chapters explore how actors identify their interests mobilize them into action and resolve conflicts among them

The Politics of the Past in an Argentine Working-Class Neighbourhood Lindsay DuBois, 2008-05-15 The Argentine dictatorship of 1976 to 1983 set out to transform Argentine society Employing every means at its disposal including rampant violation of human rights union busting and regressive economic policies the dictatorship aimed to create its own kind of order Lindsay DuBois's *The Politics of the Past* explores the lasting impact of this authoritarian transformative project for the people who lived through it DuBois's ethnography centres on Jos Ingenieros a Buenos Aires neighbourhood founded in a massive squatter invasion in the early 1970s and describes how the military government's actions largely subdued a politically engaged community DuBois traces how state repression and community militancy are remembered in Jos Ingenieros and how the tangled and ambiguous legacies of the past continued to shape ordinary people's lives years after the collapse of the military regime This rich and evocative study breaks new ground in its exploration of the complex relationships between identity memory class formation neoliberalism and state violence

Market Economics and Political Change Juan D. Lindau, 2000-01-01 Does market liberalization promote democracy The accepted answer from scholars pundits and politicians alike has been yes However the contributors to this innovative study of market reforms and political change in Mexico and the People's Republic of China argue that this easy equation is not only empirically uncertain but methodologically flawed Using comparative contextual analysis the contributors carefully identify the elective affinities between these two very different polities to reveal key variables that determine how markets will affect democracy particularly law as the rudder of democracy and the role of political culture in civil society

Poverty and Austerity amid

Prosperity Gregg M. Olsen, 2021-09-15 Poverty and Austerity amid Prosperity puts a sharp focus on rising levels of poverty and homelessness in Canada the United Kingdom and the United States Highlighting the important differences between these countries Gregg M Olsen examines how poverty and homelessness have been conceptualized defined measured and addressed in each country Olsen critically contrasts the two main theoretical traditions individual and societal that have emerged to explain poverty and homelessness Ultimately he argues that societal approaches to the study of poverty are better equipped to explain the developments unfolding across these nations and that the eradication of poverty will only happen when the socioeconomic system has been seriously overhauled and founded upon economic democracy

intimate personal and family dimensions of two political activist groups the Union of National Civil Servants UPCN and the Association of State Workers ATE These two unions represent distinct political orientations within Argentina's broad vibrant labor movement The UPCN identifies as predominantly Peronist disciplined and supportive of incumbent government while the ATE prides itself on its democratic horizontal approach and relative autonomy from the electoral process Sian Lazar examines how activists in both unions create themselves as particular kinds of militants and forms of political community The Social Life of Politics places the lived experience of political activism into historical relief and shows how ethics and family values deeply inform the process by which political actors are formed understood and joined together through collectivism

Local Greg Sharzer, 2012-04-27 Can making things smaller make the world a better place No Local takes a critical look at localism an ideology that says small businesses ethical shopping and community initiatives like gardens and farmers markets can stop corporate globalization These small acts might make life better for some but they don't challenge the drive for profit that's damaging our communities and the earth No Local shows how localism's fixation on small comes from an outdated economic model Growth is built into capitalism Small firms must play by the same rules as large ones cutting costs exploiting workers and damaging the environment Localism doesn't ask who controls production allowing it to be co-opted by governments offloading social services onto the poor At worst localism becomes a strategy for neoliberal politics not an alternative to it No Local draws on political theory history philosophy and empirical evidence to argue that small isn't always beautiful Building a better world means creating local social movements that grow to challenge not avoid market priorities

Inhabiting the Earth Martin Locret-Collet, Simon Springer, Jennifer Mateer, Maleea Acker, 2021-10-25 Over the last several decades scholars and practitioners have progressively acknowledged that we cannot consider cities as the place

where nature stops anymore resulting in urban environments being increasingly appreciated and theorized as hybrids between nature and culture entities made of socio ecological processes in constant transformation Spanning the fields of political ecology environmental studies and sociology this new direction in urban theory emerged in concert with global concern for sustainability and environmental justice This volume explores the notion that connecting with nature holds the key to a more progressive and liberatory politics Stories, Identities, and Political Change Charles Tilly, 2002-10-28 An award winning sociologist Charles Tilly has been equally influential in explaining politics history and how societies change Tilly's newest book tackles fundamental questions about the nature of personal political and national identities and their linkage to big events_ revolutions social movements democratization and other processes of political and social change Tilly focuses in this book on the role of stories as means of creating personal identity but also as explanations true or false of political tensions and realities He uses well known examples from around the world_ the Zapatista rebellion Hindu Muslim conflicts and other examples in which nationalism and other forms of group identity are politically pivotal Tilly writes with the immediacy of a journalist but the profound insight of a great theorist **Planning, Politics and the State** Nicholas Low, 2013-09-13 First Published in 1990 John Maynard Keynes once made the bold prediction that the three hour work day would prevail for his grandchildren's generation Seventy years later the question of working time is as pertinent as it was at the inception of the 40 hour week Not until now however has there been a global comparative analysis of working time laws policies and actual working hours Despite a century long optimism about reduced working hours and some progress in legal measures limiting working hours this book demonstrates that differences in actual working hours between industrialized and developing countries remain considerable without any clear sign of hours being reduced This study aims to offer some suggestions about how this gap can begin to be closed most basic questions facing planning theory and practice today The author argues that it is not plans that determine the shape of cities but political processes In the 1980s state planning came under siege planners had to justify their existence to politicians the business world and the public Though planning must still be accountable neither the complete domination of the market nor traditional post war planning ideologies are wholly acceptable in the 1990s A new agenda and a major rethinking of planning from first principles is required but what form should this take Showing that political theory provides the proper foundation for understanding planning practice the book explores in turn assenting and dissenting planning paradigms Exploration of the former begins with Weber and moves through pluralism corporatism and neo liberalism Dissenting theory is organized around the work of Marx orthodox neo Marxism Gramsci's philosophy of praxis the critical theory of the Frankfurt School and the work of Habermas The author concludes with a presentation of an integrated political perspective upon planning and the state
