Protectionism And Liberalisation Ireland And The Election:

Protectionism to Liberalisation Maurice Fitzgerald, 2018-02-06 This title was first published in 2000 This work examines Irish government towards European integration in the second post war decade by concentrating on crisis points or flash points it does this in a fairly subject oriented manner concerning Dublin's decision making processes The central themes of this study are concentrated on economic matters but they deal with other tenets when relevant too be they of a cultural diplomatic ideological military political or social nature

Sean Lemass Bryce Evans, 2011-08-17 Se n Lemass enjoys unrivalled acclaim as the Architect of Modern Ireland Yet there remain great gaps in our knowledge of this mythic figure and his golden age Up to now Lemass a colossus of twentieth century Irish history was airbrushed to fit a narrative of national progress Today this narrative is undergoing an agonising reappraisal This groundbreaking study reveals the man behind the myth and asks questions previously skirted around What emerges is an authoritarian cunning workaholic patriot a shrewd political tactician whose impatience lay not just with the old Ireland but with democracy itself This is the untold story of a great man and his lasting impact on a nation's imagination

Exchange Rates and Economic Policy in the 20th Century Derek H. Aldcroft, 2017-07-05 The themes of this study are the exchange rate regimes chosen by policy makers in the twentieth century the means used to maintain these regimes and the impact of these decisions on individual national economies and the world economy in general The book draws heavily on new research showing the lessons and the legacy left for policy makers by the gold standard and the attempt at its resurrection in the 1920s In examining issues such as the gold exchange standard the gold bullion standard the experience of floating exchange rates the Bretton Woods arrangements the EMS and the ERM and the Currency Board approach there is a conscious attempt to draw out the relevance of history for policy makers now

From the Bog to the Cloud Patrick Bresnihan, Patrick Brodie, 2025-10-24 The green digital transition is underway But what does this transition look like when dictated by the energy and resource demands of monopoly tech How has this situation come to be And where is it being resisted This provocative book uncovers the hidden intersections of land resource extraction and climate policy in the transition to greener and smarter economies Challenging eco modern and techno solutionist approaches the book links narratives of sustainability with colonial histories and uneven development arguing that tech driven transitions replicate exploitative patterns of imperial capitalism Using Ireland as a focal point the authors show how the history and depth of the country's postcolonial dependency on multinational investment especially US technology companies comes into friction with disparate land based struggles Thinking with these movements the book offers a critique of dependent models of development and proposes an anti imperialist approach to environmental politics

A New Approach to Global Studies from the Perspective of Small Nations Kiyonobu Date, Jean-François Laniel, 2023-12-13 With emphasis on East Asian and North American examples notably Japan and Quebec Date Laniel and their contributors take a new approach to the understanding of small nations and their role in the international system Small nations by their very

nature raise significant questions about what a nation is Some small nations are sovereign states with relatively small populations and limited territory others are nations within larger sovereign states with distinctive cultures governance structures or other features that differentiate them from their parent state By focussing on non European nations in particular the contributors to this volume challenge our conceptions of what a small nation is and how it operates within the international system They focus in particular on the nation within a nation state of Quebec and on Japan supplemented by further examples from East Asia By interrogating what these examples have to show us about the typology and character of small nations they offer a critique of superpower and draw out the potential of small nation studies A valuable resource for students and scholars of international relations and theories of the nation and nation state The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Geography Is Destiny Ian Morris, 2022-06-07 In the wake of Brexit Ian Morris chronicles the ten thousand year history of Britain's relationship to Europe as it has changed in the context of a globalizing world When Britain voted to leave the European Union in 2016 the 48 percent who wanted to stay and the 52 percent who wanted to go each accused the other of stupidity fraud and treason In reality the Brexit debate merely reran a script written ten thousand years earlier when the rising seas physically separated the British Isles from the European continent Ever since geography has been destiny yet it is humans who get to decide what that destiny means Ian Morris the critically acclaimed author of *Why the West Rules for Now* describes how technology and organization have steadily enlarged Britain's arena and how its people have tried to turn this to their advantage For the first seventy five hundred years the British were never more than bit players at the western edge of a European stage struggling to find a role among bigger richer and more sophisticated continental rivals By 1500 CE however new kinds of ships and governments had turned the European stage into an Atlantic one with the English Channel now functioning as a barrier England transformed the British Isles into a United Kingdom that created a worldwide empire Since 1900 thanks to rapid globalization Britain has been overshadowed by American European and increasingly Chinese actors In trying to find its place in a global economy Britain has been looking in all the wrong places The ten thousand year story bracingly chronicled by *Geography Is Destiny* shows that the great question for the current century is not what to do about Brussels it's what to do about Beijing
