Protein Formulation And Delivery:

Protein Formulation and Delivery Eugene J. McNally, Eugene McNally, Jayne E. Hastedt, 2007-10-26 This title is intended to assist pharmaceutical scientists in the development of stable protein formulations during the early stages of the product development process providing a comprehensive review of mechanisms and causes of protein instability in formulation development coverage of accelerated stability testing methods and relevant analytical **Therapeutic Protein and Peptide Formulation and Delivery** Zahra Shahrokh, 1997 This volume reviews protein stability and the analytical and biophysical characterization of proteins It emphasizes drug delivery approaches especially local delivery through the skin Including both academic and industrial perspectives from such companies as Genentech Amgen and Merck the book also discusses novel drug delivery polymers and the development of pharmaceutical protein formulations *Formulation and Delivery of Proteins and Peptides* Jeffrey L. Cleland, Robert S. Langer, 1994 Presents an updated review of the recent research in formulation and delivery of proteins and peptides Examines measurement and characterization of degradation products formed during storage degradation mechanisms and model systems designed to predict formulation stability Discusses stabilization of proteins and peptides through lyophilization and focuses on the use of FTIR as a tool for understanding the role of excipients during lyophilization Describes potential new routes and methods of delivery such as depot systems based on biodegradable polymers and aerosol systems for pulmonary delivery Therapeutic Peptides and Proteins Ajay K. Banga, 1997-07-01 From the Preface At the time of this writing the American biotechnology and pharmaceutical industry has more than two dozen biotechnology derived therapeutic proteins on the market while several hundred are in various stages of human clinical trials or at the FDA for review Today more than a thousand companies are involved in biotechnology research with a total revenue of 7.7 billion for 1993 Therapeutic peptides and proteins are expected to mitigate suffering in coming years as anticancer agents hormones growth factors analgesics anti hypertensives and thrombolytics among others However the clinical application of these therapeutic peptides and proteins is limited by several problems such as lack of physical and chemical stability or the lack of desirable attributes for adequate absorption or distribution Thus as these therapeutic peptides and proteins are made available it will be essential to formulate these drugs into safe stable and efficacious delivery systems The pharmaceutical scientist involved in this effort needs to call upon the knowledge of several disciplines such as pharmaceuticals medicinal chemistry biochemistry and microbiology and needs to keep abreast with the latest research in the published literature This book presents these principles in a simple interesting and practically useful manner for the benefit of scientists working in this area and to further research in this area This book will also provide useful information for students and academic researchers and add to their interest in this area The book should also be useful in a hospital setting to understand potential physicochemical stability problems that may result during reconstitution or administration of the new recombinant proteins Since this field is relatively new and rapidly evolving efforts were made to

include very recent literature in the book As a result over 40% of the literature citations in the book are for the work published in the last two years Biodrug Delivery Systems Mariko Morishita, Kinam Park, 2016-04-19 Biodrug Delivery Systems Fundamentals Applications and Clinical Development presents the work of an international group of leading experts in drug development and biopharmaceutical science who discuss the latest advances in biodrug delivery systems and associated techniques The book discusses components of successful formulation delivery and p **Therapeutic Peptides and Proteins** Ajay K. Banga, 2015-04-23 There are more than 500 biopharmaceuticals on the market including more than 200 therapeutic proteins making biologics the fastest growing sector in the biopharmaceutical market These products include more than 40 monoclonal antibodies for indications ranging from treatment or mitigation of various types of cancer to rheumatoid arthritis The c *Therapeutic Peptides and Proteins* Ajay K. Banga, 2005-09-14 Upon publication of the first edition of Therapeutic Peptides and Proteins ten years ago there were only 19 biotechnology medicines on the market Currently there are more than 100 with at least 400 more in various stages of development That alone would be grounds for a new edition Add to that the fact that it is still difficult to find up Formulation and Delivery of Proteins and Peptides, 1994 *Excipient Development for Pharmaceutical, Biotechnology, and Drug Delivery Systems* Ashok Katdare, Mahesh Chaubal, 2006-07-28 To facilitate the development of novel drug delivery systems and biotechnology oriented drugs the need for new yet to be developed and approved excipients continues to increase Excipient Development for Pharmaceutical Biotechnology and Drug Delivery Systems serves as a comprehensive source to improve understanding of excipients and forge potential new avenues for regulatory approval This book presents detailed up to date information on various aspects of excipient development testing and technological considerations for their use It addresses specific details such as historical perspective preclinical testing safety and toxicology evaluation as well as regulatory quality and utility aspects The text also describes best practices for use of various functional excipients and extensive literature references for all topics **Novel Therapeutics from Modern Biotechnology** Dale L. Oxender, Leonard E. Post, 2013-06-29 A cover story of Business Week Magazine in January 1984 stated Biotech Comes of Age In February 1986 Venture Magazine had a cover article entitled The Biotech Revolution is Here This article went on to say New Genetic Technologies Will Transform Our Lives These announcements were made many years after the first biotechnology companies such as Genentech Cetus Amgen and Biogen were formed to commercialize the New Biology At the time of writing this book there are over 1300 biotech companies developing new technologies or identifying potential biotech drugs Most of these companies were started in the height of the high technology hype although companies are still forming as the technology advances A more recent survey showed only a relatively small number of Food and Drug Administration FDA approvals among over several hundred biotech nology products now in clinical trial One could ask why it has taken so long to produce biotechnology products Part of the reason is that each new class of biotech products brings with it a set of problems that need to be solved before they enter clinical trials

These problems are often unique to biotechnology products such as peptides proteins monoclonal antibodies nucleic acids and cellular therapies
