The New Law of Peaceful

Protest David Mead, 2010-04-06 The right to demonstrate is considered fundamental to any democratic system of government yet in recent years it has received little academic attention However events following the recent G20 protests in April 2009 make this a particularly timely work Setting out and explaining in detail the domestic legal framework that surrounds the right of peaceful protest the book provides the first extensive analysis of the Strasbourg jurisprudence under Articles 10 and 11 of the European Convention on Human Rights offering a critical look at recent cases such as Lingner Vajnai Bukta Oya Ataman Patyi and Ziliberberg as well as the older cases that form its bedrock The principles drawn from this case law are then synthesised into the remainder of the book to see how the right of protest enshrined in the Human Rights Act 1998 now operates The five central chapters show how the right is defined the restrictions on the choice of location of a protest the constraints imposed on peaceful persuasive protest the near total intolerance of any form of obstructive or disruptive protest the scope of preventive action by the police and the extent to which commercial targets can avail themselves of private law remedies This contemporary landscape is highlighted by critical analysis of the principles and case law including the leading decisions in Laporte Austin Jones and Lloyd and Kay The book also highlights and develops themes

that are currently under theorised or ignored including the interplay of the public and the private in regulating protest the pivotal role played by land ownership rules and the disjuncture between the law in the books and the law in action While the book will appeal primarily to scholars students and practitioners of law as well as to campaigners and interest groups it also offers political and socio legal insights which will be of interest equally to non specialists Understanding Health Policy Rob Baggott,2015-10-14 In recent years the pace of reform in health policy and the NHS has been relentless But how are policies formed and implemented This fully updated edition of a bestselling book explores the processes and institutions that make health policy examining what constitutes health policy where power lies and what changes could be made to improve the quality of health policy making Drawing on original research by the author over many years and a wide range of secondary sources the book examines the role of various institutions in the formation and implementation of health policy Unlike most standard texts it considers the impact of devolution in the UK and the role of European and international institutions and fills a need for an up to date overview of this fast moving area It features new case studies to illustrate how policy has evolved and developed in recent years This new edition has been fully updated to reflect policies under the later years of New Labour and the Coalition government Although written particularly with the needs of students and tutors in mind this accessible textbook will also appeal to policy makers and practitioners in the health policy field *Peace Movements: International Protest and World Politics Since 1945* April Carter,2014-09-11 There is a long tradition of opposition to war and organized peace campaigns date from 1815 Since 1945 however modern weapons technology has threatened world wide destruction and has stimulated widespread protests This book sketches in the background of thinking about peace and resistance to war before 1945 and then examines how public opposition to nuclear weapons and testing grew in the 1950s and early 1960s Later chapters cover the major resurgence of nuclear disarmament campaigns in the 1980s The book also looks at how peace protest has spread from its origins in North America and North West Europe to embrace many parts of the world opposition to nuclear testing has indeed been particularly strong in Japan Australia New Zealand and the Pacific islands The period 1945 to 1990 was dominated by the Cold War between the USA and USSR and the role of the Soviet sponsored World Peace Council caused difficulties for indepentent peace groups in the West During the 1980s the emergence of autonomous peace activity in a number of East European countries and even on a very small scale in the USSR itself transformed the possibilities for East West co operation between citizens to urge disarmament and political change A chapter examines these developments Opposition to all forms of militarism has spread in the last 30 years This book charts the struggles to extend the right to conscientious objection to military service and draft resistance to particular wars for example in Southern Africa and Israel It also looks in some detail at the growing opposition to the war in the Vietnam The recent protests against the Gulf War are surveyed briefly in an epilogue Critical Environmental Politics Carl Death,2013-12-04 The aim of this book is to review central concepts in the study of environmental politics and to open up

new questions problems and research agendas in the field The volume does so by drawing on a wide range of approaches from critical theory to poststructuralism and spanning disciplines including international relations geography sociology history philosophy anthropology and political science The 28 chapters cover a range of global and local studies illustrations and cases These range from the Cochabamba conference in Bolivia to climate camps in the UK UN summits in Rio de Janeiro and Johannesburg to climate migrants from Pacific islands forests in Indonesia to Dutch energy governance reform indigenous communities in Namibia to oil extraction in the Niger Delta survivalist militias in the USA to Maasai tribesmen in Kenya Rather than following a regional or issue based e g water forests pollution etc structure the volume is organised in terms of key concepts in the field including those which have been central to the social sciences for a long time such as citizenship commodification consumption feminism justice movements science security the state summits and technology those which have been at the heart of environmental politics for many years including biodiversity climate change conservation eco centrism limits localism resources sacrifice and sustainability and many which have been introduced to these literatures and debates more recently biopolitics governance governmentality hybridity posthumanism risk and vulnerability Features and benefits of the book Explains the most important concepts and theories in environmental politics Reviews the core ideas behind crucial debates in environmental politics Highlights the key thinkers both classic and contemporary for studying environmental politics Provides original perspectives on the critical potential of the concepts for future research agendas as well as for the practice of environmental politics Each chapter is written by leading international authors in their field This exciting new volume will be essential textbook reading for all students of environmental politics as well as provocatively presenting the field in a different light for more established researchers
