Morrison, 2013-09-13 Linda Morrison brings the voices and issues of a little known complex social movement to the attention of sociologists mental health professionals and the general public The members of this social movement work to gain voice for their own experience to raise consciousness of injustice and inequality to expose the darker side of psychiatry and to promote alternatives for people in emotional distress Talking Back to Psychiatry explores the movement's history its complex membership its strategies and goals and the varied response it has received from psychiatry policy makers and the public at large *Women's Health in Canada* Marina Morrow, Olena Hankivsky, Colleen Varcoe, 2008-05-03 In recent years healthcare professionals have recognized the distinctly different healthcare needs and concerns of men and women Women's health in particular has come into its own in the last two decades In Canada however there has been little available in the way of a general text on women's health This volume works toward filling that gap by providing a resource for teaching and understanding women's health in this country To lay out the methodological and theoretical foundations for their study editors Olena Hankivsky Marina Morrow and Colleen Varcoe bring together an interdisciplinary group of scholars and practitioners from economics anthropology sociology nursing political studies women's studies and psychology Contributors draw on the rich history of the Canadian women's health movement providing analysis of that history and of the emergent theory policy and practice Aimed at undergraduate and graduate students as well as practitioners the collection adopts an intersectional approach looking closely at social factors such as gender race ethnicity class sexuality and gender identity and analysing how they relate both to each other and to women's health Connections between the social economic and cultural contexts of women's lives and their physical spiritual and mental well being are a primary focus Providing a much needed resource for teachers students and practitioners of women's health in Canada this comprehensive volume makes an important contribution to the literature *Responding to Men in Crisis* Brian Taylor, 2004-08-02 Responding to Men in Crisis is based on new research looking at gendered assumptions about rationality and men's mental health It looks at postmodern theory in relation to masculinities and madness and discusses key contemporary debates in political uses of risk dangerousness and so on The author relates this to a discussion of current policy and practice responses to men within the mental health system It offers the reader a theoretical exploration of a topically and politically sensitive issues and is relevant to service user involvement and survivor movements making it essential reading for academics and students of sociology and allied disciplines **The First Resort** Matthew Smith, 2023-01-17 Social psychiatry was a mid twentieth century approach to mental health that stressed the prevention of mental illness rather than its treatment Its proponents developed environmental explanations of mental health arguing that socioeconomic problems such as poverty inequality and social isolation were the underlying causes of mental illness The influence of social psychiatry contributed to the closure of psychiatric hospitals and the emergence of community mental health care during the 1960s By the 1980s however social

psychiatry was in decline having lost ground to biological psychiatry and its emphasis on genetics neurology and psychopharmacology *The First Resort* is a history of the rise and fall of social psychiatry that also explores the lessons this largely forgotten movement has to offer today Matthew Smith examines four ambitious projects that investigated the relationship between socioeconomic factors and mental illness in Chicago New Haven New York City and Nova Scotia He contends that social psychiatry waned not because of flaws in its preventive approach to mental health but rather because the economic and political crises of the 1970s and the shift to the right during the 1980s foreclosed the social changes required to create a more mentally healthy society Smith also argues that social psychiatry provides timely insights about how progressive social policies such as a universal basic income can help stem rising rates of mental illness in the present day

The Morals and Politics of Psychology Isaac Prilleltensky, 1994-01-01 This book explores the moral social and political implications of dominant psychological theories and practices The analysis entails the therapeutic uses of psychoanalysis cognitive behavioral and humanistic psychology as well as the practice of clinical school and industrial organizational psychology It is argued that applied psychology strengthens the societal status quo thereby contributing to the perpetuation of social injustice Most discussions of morality in psychology deal with the ethical repercussions of practices on individual clients This book is unique in that it deals with the social ethics of psychology that is with the social morality of the discipline It is also unique in that it offers a comprehensive critique of the most popular psychological means of solving human problems The author does not stop at the level of critique but provides a vision for including the values of self determination distributive justice collaboration and democratic participation in psychology He shows how some of these values have already been adopted by feminist and community psychologists Given the prominence of psychology in contemporary society *The Morals and Politics of Psychology* should be of interest to mental health professionals and their clients as well as to people concerned with morality and social justice

Radical Feminist Therapy Bonnie Burstow, 1992-10-08 This is an interesting book It may be useful for those who have not followed the debate on the experience of women in psychiatric services It provides useful information on ways of working with more disturbed women These are women whom psychiatric services often avoid or at least with whom they do little constructive work The emphasis on offering therapy to these women instead of a bed in an institution was refreshing Andrea Bennett in *Clinical Psychology Forum* How can counselors and clinicians help empower women in a sexist racist and homophobic society How can they help women reclaim their bodies Or repair their violated bond with womenkind Taking feminist therapy one step further this enlightening volume focuses on a central problem in our society violence against women and explores practical feminist ways of working with women s responses to it depression cutting splitting troubled eating and protest *Radical Feminist Therapy* explores issues that are usually either omitted or pathologized in generalist feminist counseling texts such as women battered by their pimps women who self mutilate and psychiatrized women Other topics covered are working with lesbians

American Indian African American Jewish and immigrant women women with disabilities working with heterosexual couples sexual violation by therapists and working with suicidal clients A list of recommended readings follows each chapter Radical Feminist Therapy addresses the needs of both students and practitioners in the areas of psychology counseling social work and women s studies who desire a comprehensive enlightening text they will refer to again and again Burstow s book should prove very useful as a resource for practitioners in a wide variety of areas dealing with violence against women The first part of the book presents the theoretical foundations the remaining 12 chapters integrate theory and practice Written from a well articulated radical feminist position the text is grounded in structuralist theory that situates problems in living within the systematic oppressions of classism sexism and racism Respect for women and for their right to make their own decisions in therapy permeates the text Choice This book fills a gap in the literature addressed by no other publication I have seen There are numerous theoretical books on feminist counseling or therapy But I have seen nothing which moves from theory to clear practical suggestions on what to do and how to do it when working with women on different problems Bonnie begins by presenting a clear feminist framework in which she sees violence against women in our society as the central problem in all women s lives She explains how this core issue plays itself out in different areas of women s lives and how it is central to the personal problems women struggle with She then goes on to give practical concrete suggestions about how to actually work with women in therapy She warns readers of common pitfalls and how to avoid them It is an extremely cohesive and useful piece of work Linda Advokaat Feminist Counselor Sessional Instructor Carleton University Ottawa Canada As a presentation of theory translated into casework this is the best I have seen in its field a deft integration of politics and philosophy made relevant and workable in the chosen context Counselling
