Raised Up Down Yonder Angela McMillan Howell,2013-11-08 Raised Up Down Yonder attempts to shift focus away from why black youth are problematic to explore what their daily lives actually entail Howell travels to the small community of Hamilton Alabama to investigate what it is like for a young black person to grow up in the contemporary rural South What she finds is that the young people of Hamilton are neither idly passing their time in a stereotypically languid setting nor are they being corrupted by hip hop culture and the perils of the urban North as many pundits suggest Rather they are dynamic and diverse young people making their way through the structures that define the twenty first century South Told through the poignant stories of several high school students Raised Up Down Yonder reveals a group that is often rendered invisible in society Blended families football sagas crunk music expanding social networks and a nearby segregated prom are just a few of the fascinating juxtapositions Howell uses personal biography historical accounts sociolinguistic analysis and community narratives to illustrate persistent racism class divisions and resistance in a new context She addresses contemporary issues such as moral panics regarding the future of youth in America and educational policies that may be well meaning but are ultimately misguided

Improving Adolescent Dietary Behaviour Charlotte Evans,2020-12-10 Adolescents in many countries consume poor quality diets that include high intakes of sugary drinks and fast food and low intakes of vegetables The aims of this Special Issue on adolescent dietary behavior were to identify methods and approaches for successful interventions to improve diet quality in this age group and identify at risk subgroups that need particular attention In total 11 manuscripts were published in this Special Issue three qualitative studies that included a systematic review five cross sectional studies and three quantitative evaluations of interventions This Special Issue discusses the contribution of the studies and provides suggestions to improve the success of future interventions in adolescents It is important that adolescents are involved in the design of interventions to improve social and cultural acceptability and relevance Interventions targeting schools or communities framed within a larger food system such as issues around climate change and the carbon footprint of food may

improve engagement Targeting adolescents in areas of deprivation is a priority where diet quality is particularly poor Potentially successful interventions also include environmental policies that impact the cost and marketing of food and drinks although evaluations of these were not included in this Special Issue

Promoting Behaviour for Learning in the Classroom Simon Ellis, Janet Tod, 2014-10-17 Promoting Behaviour for Learning in the Classroom offers essential support to help you develop capacity and confidence in managing behaviour in the group setting of the classroom It provides a concise analysis of established behaviour management strategies recognising that no single approach will work for all pupils and that central to effective practice is an understanding of the different personal attributes and experiences teachers and pupils bring to the classroom Illustrated by examples from the classroom Promoting Behaviour for Learning in the Classroom uses the tried and tested Behaviour for Learning framework to show how teachers expertise in promoting learning can be used to improve behaviour Key issues considered include Developing positive relationships in the classroom Understanding personal style and self management Effective use of feedback and rewards Using positive correction and sanctions Working with school systems and frameworks for managing behaviour Individual differences and special educational needs Dealing with challenging behaviour Written by experts in the field Promoting Behaviour for Learning in the Classroom offers much needed in depth realistic support and guidance to show teachers how to improve learning and behaviour in the group setting of the classrooms

practiceplanners **Teacher-Pupil Conflict in Secondary Schools (1987)** Kate Cronk, 2018-01-12 Published in 1987 the central question with which this book is concerned is what can and should teachers do about teacher pupil conflict in schools Few teachers in secondary education would need to have this sort of conflict described as even if that have been fortunate enough to avoid it themselves they will know of it from staffroom discussion and from the media In can be seen in disorderly classrooms where pupils mess about and have a laugh and in the bleak expression on the face of their teacher Equally it can be detected in those classrooms where the teacher is in firm control but where pupils gaze listlessly out of the window or only minimally comply with work demands It is characterized by sudden blazing temper on both sides and also by long periods of weariness boredom and disengagement It is not that conflict which might arise from temporary private troubles from having a bad day or going through a bad patch for it is there week in week out and involves significant numbers Such conflict has been of interest to both psychologists and sociologists of education and important contributions have been offered by both of these disciplines Sociologists have mapped out the differing cultural values and norms which appear to promote it They have identified the social constraints present within the environment in which it is produced constraints which emanate from the socio economic organization of society and from the maintenance of an institutional framework and which affect the micro dynamics of teacher pupil interaction Psychologists have described the effects on behaviour of genetic factors environmental conditions and cognitive states Important though such insights are however they can only speak indirectly to teacher practice This book provides an educational approach to the subject discussing topics including theoretical considerations teacher pupil discussion and relationships between classroom behaviour and the curriculum It will appeal to those involved with schools and education as well as psychologists educational sociologists and researchers

Improving Mental Health Care Barbara Dickey, Lloyd I. Sederer, 2008-08-13 How can professionals maintain or improve the quality of care they provide when pressured by payers to reduce the cost of care Clinicians today face the

challenge of providing optimal care in an environment where costs drive clinical practice But high quality not cost remains the goal of professionals By arming themselves with measurable results clinicians can improve the processes of delivering mental health care and translate those improvements into better outcomes for patients and their families In this timely guide the editors have gathered the work of 49 distinguished contributors and crafted a valuable resource for overcoming the extraordinary challenge of delivering high quality mental health care This groundbreaking book is divided into three sections The challenges today's clinicians face in providing optimal mental health care Beginning with a review of the report to then President Clinton from the Advisory Commission on Consumer Protection and Quality in the Health Care Industry subsequent chapters discuss professional ethics and managed care how Wall Street investors are changing the practice of medicine problems faced by managed care and changes needed in medical education to ensure that physicians are well prepared to practice medicine in the 21st century Proven techniques for quality measurement Measuring quality of care presents significant conceptual and methodological problems These chapters review quality measurement methods and describe support by the federal government to improve these methods Also addressed are how consumers are joining the quality of care measurement movement and how one large urban county mental health program is advancing quality measurement Fourteen case reports of quality improvement projects These chapters detail principles and techniques that can be replicated or tailored to fulfill the requirements of a variety of clinical settings ranging from the national health service in Great Britain to a small geriatric unit in a large hospital The work showcased here was done by clinicians or administrators who concerned about the quality of care in their own settings used data to test for themselves whether their interventions resulted in improved care Even if managed care disappeared we would still need to question examine and improve the quality of patient care with clinicians taking the lead because only they can appreciate the subtle nuances that maintain or improve quality standards and only they can make substantive changes in their clinical settings As both a broad conceptual framework for considering the quality of mental health care and as a practical field guide to real life techniques for measuring the quality of care this volume will prove exceptionally valuable for mental health care professionals administrators and policymakers as well as for consumers and consumer advocates researchers students and public health professionals
