Segal, 2021-11-08 A 2022 Choice Reviews Outstanding Academic Title Takes the first in depth look at the New York City adoption agency that separated twins and triplets in the 1960s and the controversial and disturbing study that tracked the children's development while never telling their adoptive parents that they were raising a singleton twin In the early 1960s the head of a prominent New York City Child Development Center and a psychiatrist from Columbia University launched a study designed to track the development of twins and triplets given up for adoption and raised by different families The controversial and disturbing catch None of the adoptive parents had been told that they were raising a twin the study's investigators insisted that the

separation be kept secret Here Nancy Segal reveals the inside stories of the agency that separated the twins and the collaborating psychiatrists who along with their cadre of colleagues observed the twins until they turned twelve This study far outside the mainstream of scientific twin research was not widely known to scholars or the general public until it caught the attention of documentary filmmakers whose recent films *Three Identical Strangers* and *The Twinning Reaction* left viewers shocked angered saddened and wanting to know more Interviews with colleagues friends and family members of the agency's psychiatric consultant and the study's principal investigator as well as a former agency administrator research assistants journalists ethicists attorneys and most importantly the twins and their families who were unwitting participants in this controversial study are riveting Through records letters and other documents Segal further discloses the investigators attempts to engage other agencies in separating twins their efforts to avoid media exposure their worries over informed consent issues in the 1970s and the steps taken toward avoiding lawsuits while hoping to enjoy the fruits of publication Segal's spellbinding stories of the twins separation loss and reunion offers readers the behind the scenes details that until now have been lost to the archives of history

Twins - From Fetus to Child Alessandra Piontelli, 2012-09-10 Though much has been written about twins very little research has been done into their everyday lives both postnatal and prenatal In this fascinating new study Alessandra Piontelli follows the development and behaviour of thirty pairs of twins from their early life in the womb through to their third year of childhood Drawing on detailed ultrasound observations and work with mothers and families in clinical and natural settings the text traces the subtle ways in which various types of twins live behave and interact with their unequally shared and unique pre and postnatal environments Piontelli shows how from early on distinctive and personal traits can be seen in the behaviour of each member of a twin couple and how these traits continue and strengthen well beyond birth The book describes not only the behaviour of the twins but the impact they have on the lives of their family and carers what family members say how they react and how the family changes Scientifically based but warmly human in content this unique longitudinal study offers new insight for professionals working with mothers and families of twins and for researchers in human development across a range of disciplines
