Random Necessities:

Secrets of an Organized Mom Barbara Reich, 2014-04 Everyone should Barbara Reich raves The New York Times A life changing program for streamlining everything that is weighing you down from over stuffed closets to overwhelming social calendars courtesy of the media go to organizing guru Barbara Reich Mothers can feel like life is one neverending loop Just when one problem or responsibility is handled another one trips us up But help is on the way Barbara Reich has all the strategies necessary for staying ahead of the curve and she has wrapped them up into four easy steps that can be applied to any organizing project The keys to Barbara's success are simplicity and consistency Room by room she takes readers through the most problematic areas in the home from the tornado struck play area to the over stuffed basement or storage unit Barbara shows readers how to approach organizing in manageable bites many of which can be dealt with in two hours or less With each organizing project she teaches readers how to apply the four steps 1 purge 2 design 3 organize and 4 maintain And she also reveals how to solve organizing problems that may pop up in the future from knowing when and how to keep financial papers to how to digitally organize the family's photographs As the mother of twelve year old twins Barbara offers tips for crazed moms as only a mother could Combining the humor of a sympathetic friend and the no nonsense advice of a true type A personality Reich offers clever appealing solutions that are genuinely achievable for everyone Alarming! The Chasm Separating Basic Statistics Education from its Necessities William J. Adams, 2013-05-20 The fairly large sample of current basic statistics books I gave thought to recently may in my view be characterized as number pushers with a large number of illustrations intended to convey a sense of the importance of statistics to the study of real world problems What's wrong with that Nothing provided that what I submit to be the necessities of statistics education are given the attention they warrant are not smothered by glitzy overwhelming attention to number pushing do not receive short shrift or are not mentioned at all Am I being too critical I invite you to give thought to fifteen issues questions that are the core of the aforementioned chasm and render your verdict Food for thought in support of the issues questions raised along with answers discussion are included Many students and those who apply statistics to their fields of interest subscribe to the view that to apply statistics to a problem situation all you need do is throw your data into a computer and let it do its thing The further they travel along this road of thought the more we can expect misunderstanding of statistics and when it comes to publication statistical junk I believe that the only way to change the direction of this road of thought is to incorporate into our teaching of basic statistics what is feasible of the necessities of statistics education For further discussion of the necessities of basic statistics education I recommend the book I coauthored with my colleagues Irwin Kabus and Mitchell Preiss Statistics Basic Principles and Applications 2nd ed Kendall Hunt Publishing Co 2000 or the revised 2nd ed W J Adams Xlibris 2009 Acceptance Sampling United States. Government Printing Office, 1988 **Needy Little Things** Channelle Desamours, 2025-02-04 In this debut speculative YA mystery a Black teen with premonition like powers must solve her friend's disappearance before she finds

herself in the same danger perfect for fans of Ace of Spades Sariyah Lee Bryant can hear what people need tangible things like a pencil a hair tie a phone charger an ability only her family and her best friend Malcolm know the truth about But when she fulfills a need for her friend Deja who vanishes shortly after Sariyah is left wondering if her ability is more curse than gift This isn't the first time one of her friends has landed on the missing persons list and she's determined not to let her become yet another forgotten Black girl Not trusting the police and media to do enough on their own Sariyah and her friends work together to figure out what led to Deja's disappearance When Sariyah's mother loses her job and her little brother faces complications with his sickle cell disease managing her time money and emotions seems impossible Desperate Sariyah decides to hustle her need sensing ability for cash a choice that may not only lead her to Deja but put her in the same danger Deja found herself in

Conspiracy and Contingency Thorsten

Botz-Bornstein,2025-05-13 What do conspiracy theories algorithms and meritocracy have in common All three avoid contingency and frantically look for necessities The COVID 19 crisis has brought about a proliferation of conspiracy theories that reject among other things official accounts of the virus s origins and remedies and sometimes even the existence of the virus itself Conspiratorial thinking usually links events to secret plots concocted by powerful conspirators whether it be Bill Gates or Big Pharma In this book I point to another dominant driving force the desire to find simple and apparently reasonable explanations for phenomena that are actually purely random and contingent Often unfounded conspiracy theories emerge because contingency is not accepted and necessities are looked for at all costs Nothing happens by chance and there must be a plan or an intelligent design behind everything This book deals with contingency phobia This special phobia is not only manifest in most unwarranted conspiracy theories but it also appears in Western culture as a recurrent psychological cognitive and scientific pattern It is the cause of a variety of other phenomena that have become emblematic for liberal democracies such as the contemporary algorithm culture or the obsession with merit and ranking Not only the conspiratorial mindset rejects a world of contingency and strives to create a universe structured by a necessary order life coaches algorithm engineers and neoliberal meritocrats all do the same This book analyses these phenomena by using the same criteria how do humans deal with contingency and how do they try to establish necessities Some philosophies such as Daoism and Zen Buddhism make unwarranted conspiracy theories quasi impossible because they find original ways of combining contingency with ontological theological or cosmological premises I identify sources that other disciplines examining conspiracy theories for example political science anthropology psychology or sociology have rarely seen as primary Political scientists focus on the macro level and construe conspiracy theories mostly as national or regional phenomena whereas anthropologists psychologists and sociologists tend to focus on the micro level The present study is an example of practical philosophy depicting conspiratorial thinking as an organic or a dynamic phenomenon by crystallising cognitive and cultural necessity contingency patterns that can be found in politics culture religion and science
