**Random Winds** Belva Plain, 2009-12-16 A tragedy on a cold Adirondack day robbed country doctor Enoch Farrell of his three oldest children Then all his hopes rested with his son Martin who dreamed of becoming a doctor too Intelligent gifted Martin could have a brilliant future All that stood in his way was his family s poverty until he met wealthy beautiful Mary Fern Meig and her sister Jessie and everything changed forever Moving from a teeming New York hospital to the elite operating theaters of London Martin Farrell is about to learn the price of success a secret bargain with the Meigs that could resonate into the next generation and test the strength of a man and a woman s passion across the coming years Praise for Random Winds Wonderful A convincing sweeping novel A real page turner The Philadelphia Inquirer Impossible to put down South Bend Tribune Engrossing Publishers Weekly Richly woven A twisting and complex story that touches the lives of everyone UPI NASA Technical Paper ,1983 *Proceedings of the National Symposium on Winds for Aerospace Vehicle Design* Norman Sissenwine,1962 Quantum Dynamics of Submicron Structures Hilda A. Cerdeira,B. Kramer,Gerd Schön,2012-12-06 Techniques for the preparation of condensed matter systems have advanced considerably in the last decade principally due to the developments in microfabrication technologies The widespread availability of millikelvin temperature facilities also led to the discovery of a large number of new quantum phenomena Simultaneously the quantum theory of small condensed matter systems has matured allowing quantitative predictions The effects discussed in Quantum Dynamics of Submicron Structures include typical quantum interference phenomena such as the Aharonov Bohm like oscillations of the magnetoresistance of thin metallic cylinders and rings transport through chaotic billiards and such quantization effects as the integer and fractional quantum Hall effect and the quantization of the conductance of point contacts in integer multiples of the conductance quantum Transport properties and tunnelling processes in various types of normal metal and superconductor tunnelling systems are treated The statistical properties of the quantum states of electrons in spatially inhomogeneous systems such as a random inhomogeneous magnetic field are investigated Interacting systems like the Luttinger liquid or electrons in a quantum dot are also considered Reviews are given of quantum blockade mechanisms for electrons that tunnel through small junctions like the Coulomb blockade and spin blockade the influence of dissipative coupling of charge carriers to an environment and Andreev scattering Coulomb interactions and quantization effects in transport through quantum dots and in double well potentials as well as quantum effects in the motion of vortices as in the Aharonov Casher effect are discussed The status of the theory of the metal insulator and superconductor insulator phase transitions in ordered and disordered granular systems are reviewed as examples in which such quantum effects are of great importance Transportation ,1977-08 **Photoelectric Detection on Derived Attributes of Targets** Xing Yang,Yihua Hu,2023-08-22 This book highlights the novel photoelectric detection technique on derived attributes of targets Photoelectric detection on derived attributes of targets is a new target detection and monitoring method It is achieved by

acquiring three types of attributes of the target including those that reflect the essential features of parts of the target those directly generated from the target and those synthesized by the target features The book introduces the classification of derived attributes of targets and describes typical detection methods Emphases are put on laser detection of aerial moving targets using derived attributes such as the disturbance of atmospheric wind fields trailing vortexes and the disturbance of atmospheric components The authors also elaborate on visible light imaging detection using derived attributes such as retroreflection and the identification of target carriers Besides the synthetic attributes processing of integrated aerospace images is introduced for the detection of targets on the ground and sea surfaces This book can be used as a good reference for researchers engaged in the fields of photoelectric detection target detection and image processing and as a reference book for senior undergraduates and postgraduates in relevant majors

*Random Winds* Belva Plain,1980 From a quiet turn of the century village in upstate New York to war torn London from the bedsides of the rural poor to the life and death urgency of a great New York City hospital this is a powerful epic of three generations of doctors in one magnificent family The Farrells dedicated brilliant and driven to the edge of destruction by a love no human force could suppress

**Wind Effects on Cable-Supported Bridges** You-Lin Xu,2013-03-07 As an in depth guide to understanding wind effects on cable supported bridges this book uses analytical numerical and experimental methods to give readers a fundamental and practical understanding of the subject matter It is structured to systemically move from introductory areas through to advanced topics currently being developed from research work The author concludes with the application of the theory covered to real world examples enabling readers to apply their knowledge The author provides background material covering areas such as wind climate cable supported bridges wind induced damage and the history of bridge wind engineering Wind characteristics in atmospheric boundary layer mean wind load and aerostatic instability wind induced vibration and aerodynamic instability and wind tunnel testing are then described as the fundamentals of the subject State of the art contributions include rain wind induced cable vibration wind vehicle bridge interaction wind induced vibration control wind and structural health monitoring fatigue analysis reliability analysis typhoon wind simulation non stationary and nonlinear buffeting response Lastly the theory is applied to the actual long span cable supported bridges Structured in an easy to follow way covering the topic from the fundamentals right through to the state of the art Describes advanced topics such as wind and structural health monitoring and non stationary and nonlinear buffeting response Gives a comprehensive description of various methods including CFD simulations of bridge and vehicle loading Uses two projects with which the author has worked extensively Stonecutters cable stayed bridge and Tsing Ma suspension bridge as worked examples giving readers a practical understanding
