The No-Growth Society Mancur Olsen, Hans H. Landsberg, 2013-08-21 First Published in 1975 Two policy proposals are particularly notable and owe nothing to the long standing controversies between left and right Rather they suggest new perceptions of reality and a changing sense of values They are thoroughly radical and indeed subversive since they attack two fundamental features of modern society its tendency to exponential growth and its assumption of continuous progress The two proposals are zero economic growth and zero population growth Quite apart from the question of the desirability of a no growth society or even the possibility that it may even be a necessity what properties should it have How would its social political and economic systems function What would people be like in such a society What sort of culture or consciousness would be appropriate in it A careful examination of the no growth proposals helps to reveal a number of the most fundamental failings and fears of modern life
