Raptor Research and Management Techniques Keith L. Bildstein,David Michael Bird,2007 Think about how we know about past events in human history e g the expansion of the Roman Empire or the American Revolution What types of records document those events Now think about Earth s history specifically the past environmental or climatic conditions at times before recorded human history What records might there be of such conditions Make a list of your ideas n assemblage of five major types of natural archives of Earth s environmental and climatic history What common feature s do each of these paleoclimate

archives share an assemblage of 5 major types of natural records or archives of Earth's environmental and climatic history. Just like a diary or other historical document, the layers in these natural archives contain indirect evidence, i.e. proxies, about past conditions and events recorded in a sequential order. The evidence is specific to a certain time period and may be general or very detailed depending on the rate that information was recorded. The faster the rate at which the recorder grew trees and corals, accumulated snow and ice, or was deposited sedimentary sequences, the more detailed the record is, and the higher its resolution. For example, a record in which an annual signal can be observed has a very high resolution. In contrast, if the finest observable details are on the order of a million years, then that record would have a low resolution.

*Australian High Country Raptors* Jerry Olsen, 2014-06-18. *Australian High Country Raptors* covers raptor species that regularly breed in the high country above 600 metres from Goulburn in New South Wales down to the hills outside Melbourne, Victoria. Author Jerry Olsen explores the nature of these striking animals that are classified as Accipitriformes (diurnal hawks, falcons, kites, and eagles), Falconiformes, and Strigiformes (nocturnal owls). Comparisons between these high country raptors and lower elevation breeders are also provided, in addition to comparisons with raptors found overseas, especially from North America and Europe. The book begins with a description of habitats and vegetation types in the high country and which raptors are likely to be seen in each habitat type. It continues with sections on finding and watching raptors, raptor identification, hunting styles, food, breeding, and behaviour, and conservation. Appendices provide species accounts for diurnal breeding species in the high country, with basic information about their ecology, distribution, and conservation, as well as detailed instructions about handling an injured or orphaned raptor. Illustrated throughout with photographs and drawings. *Australian High Country Raptors* offers readers a chance to look into the lives of Australia's fascinating birds of prey. **Carnivores and Raptors**
