The Animal Names of the Arab Ancestors William C. Young, 2024-02-06 In the Arab world people belong to kinship groups lineages and tribes Many lineages are named after animals birds and plants Why This survey evaluates five old explanations totemism emulation of predatory animals ancestor eponymy nicknaming and Bedouin proximity to nature It suggests a new hypothesis Bedouin tribes use animal names to obscure their internal cleavages Such tribes wax and wane as they attract and lose allies and clients they include attached elements as well as actual kin To prevent outsiders from spotting attached groups Bedouin tribes scatter non human names across their segments making it difficult to link any segment with a human ancestor Young s argument contributes to theories of tribal organization Arab identity onomastics and Near Eastern kinship

Introduction to Social Research Keith F Punch, 2005-04-23 Introduction to Social Research presents the essential elements of both qualitative and quantitative approaches for conducting empirical research in the social sciences **The Impoverishment of the African Red Sea Littoral, 1640-1945** Steven Serels, 2018-08-23 The African Red Sea Littoral currently divided between Sudan Eritrea Ethiopia and Djibouti is one of the poorest regions in the world But the pastoralist communities indigenous to this region were not always poor historically they had access to a variety of resources that allowed them to prosper in the harsh arid environment This access was mediated by a robust moral economy of pastoralism that acted as a social safety net Steven Serels charts the erosion of this moral economy a slow moving process that began during the Little Ice Age mega drought of the seventeenth and eighteenth centuries and continued through the devastating famines of the twentieth century By examining mass sedentarization after the Second World War as merely the latest manifestation of an inter generational environmental and economic crisis this book offers an innovative lens for understanding poverty in northeastern Africa **Violence in Islamic Thought from the Qur'an to the Mongols** Robert Gleave, 2015-04-14 This volume brings together some of the leading researchers on early Islamic history and thought to study the legitimacy of violence **The Nubian Past** David N. territory in Africa Not only were its international borders redrawn when South Sudan separated in 2011 but conflicts continue to erupt over access to land territorial claims are challenged by local and international actors borders are contested contracts governing the privatization of resources are contentious and the legal entitlements to agricultural land are disputed Under these new dynamics of land grabbing and resource extraction fundamental relationships between people and land are being disrupted while land has become a global commodity for millions it still serves as a crucial reference for identity formation and constitutes their most important source of livelihood This book seeks to disentangle the emerging relationships between people and land in Sudan The first part focuses on the spatial impact of resource extracting economies foreign agricultural land acquisitions Chinese investments in oil production and competition between artisanal and industrial gold mining Detailed ethnographic case studies in the second part from Darfur South Kordofan Red Sea State Kassala Blue Nile and Khartoum State show how rural people experience their land vis vis the latest wave of privatization and commercialization of land rights J rg Gertel is Professor of Economic Geography at Leipzig University Richard Rottenburg is Chair of Anthropology at the University of Halle Sandra Calkins is a Research Fellow at the Max Planck Institute for Social Anthropology in Halle
