Rating Guide To Environmentally Healthy Metro Areas:

Rating Guide to Environmentally Healthy Metro Areas Robert S. Weinhold, 1997 *Core List for an Environmental Reference Collection*, 2002 **Imaging the City** Lawrence J. Vale, Sam Bass Warner Jr., 2021-12-16 Planners face a controversial task because their professional role requires them to be spokespersons for the public interest. In a welter of conflicting pictures and voices, how might the public interest be discovered? Once identified, how might it be expressed so that competing publics attend to it? There are no easy answers, but the experience of planners today suggests ways of working and innovations of promise. The focus on planning practice prompted the editors to analyze images that are now at work in our cities. For Vale and Warner, all city design and constructions offer material that people should include in images of their environment. The built and building city are part of the experience of all city dwellers; it is theirs to incorporate, interpret, or ignore. Essays included in this text trace the interplay between physical objects of planners and architects and the social experience and outlooks of image makers and their audiences. *Imaging the City* explores urban image making from civic boosterism of medieval cities to iconic imagery of Times Square. Vale and Warner bring together urban historians, geographers, city planners, architects, and cultural commentators to analyze the creation of urban imagery from the signature skyscrapers of Kuala Lumpur to the re-creation of the South Bronx and the use of city images in film, literature, television, and on the Internet. Urban dwellers, urban planners, architects, municipal officials, sociologists, urban historians—all will perceive their worlds with a heightened sense of awareness after reading this book. **Environmental Health Planning Guide** United States. Consumer Protection and Environmental Health Service. Environmental Control Administration, 1969

Environmental Health Planning Guide United States. Public Health Service, National Center for Urban and Industrial Health (U.S.), 1967 **OECD Territorial Reviews: The Chicago Tri-State Metropolitan Area, United States 2012** OECD, 2012-08-17 The OECD Territorial Review of the Chicago Tri-State metropolitan area assesses the region's capacity to contribute effectively to regional and national economic performance and quality of life. **Environmental Health and the U.S. Federal System** Michael R. Greenberg, Dona Schneider, 2019-08-13 This book explains how the U.S. federal system manages environmental health issues with a unique focus on risk management and human health outcomes. Building on a generic approach for understanding human health risk, this book shows how federalism has evolved in response to environmental health problems, political and ideological variations in Washington, D.C., as well as in state and local governments. It examines laws, rules, and regulations showing how they stretch or fail to adapt to environmental health challenges. Emphasis is placed on human health and safety risk and how decisions have been influenced by environmental health information. The authors review different forms of federalism and analyze how it has had to adapt to ever-evolving environmental health hazards such as global climate change, nanomaterials, nuclear waste, fresh air, and water, as well as examining the impact of robotics and artificial intelligence on worker environmental health. They demonstrate the process for

assessing hazard information and the process for federalism risk management and subsequently arguing that human health and safety should receive greater attention This book will be essential reading for students and scholars working on environmental health and environmental policy particularly from a public health and risk management viewpoint in addition to practitioners and policymakers involved in environmental management and public policy
