Readings In Aging And Death:

Readings in Aging and Death Steven H. Zarit, 1977 A major purpose of the book is to explore the processes of development in the later years and their impact on people's lives. This search is not without pain or disappointment; however, involvement with older persons will bring students into contact with people who often long for human contact who can be wise or sad or funny or foolish but who give us a sense of our past and a view of the present that otherwise would be lost to us. There is a special delight in bridging over age differences with warmth and understanding. In addition to our personal enrichment, a balanced view of aging emphasizing both the continuing strengths and abilities as well as the difficulties that may confront the old is of value to the student who may enter a profession that directly serves older persons or who may work as a volunteer or for relating to one's parents when they are old. Ultimately too, we should gain some perspective on our own aging. In this book, there has been an attempt to present aging from a variety of perspectives in articles that are free from excessive professional jargon. They have been chosen as reflective of the major issues in the field of gerontology. Basic concepts of the aging process are presented in the initial two sections. *Readings in Aging and Death*, 1977 **Aging** Harry R. Moody, 2006-01-13 Welcome to the world's most unique and dynamic textbook on aging. Widely praised and adopted in previous editions, the Fifth Edition of *Aging* once again presents key issues in an engaging and accessible fashion. Organized unlike any other traditional textbook, author Harry R. Moody presents basic concepts followed by controversies supported by carefully chosen adapted readings. The result is the most captivating introduction to gerontology available today.

Essential Readings in Infectious Disease Epidemiology Manya Magnus, 2009 *Essential Readings in Infectious Disease Epidemiology* is a collection of readings and practice exercises designed to complement the methods training presented in the main text *Essentials of Infectious Disease Epidemiology*, where the parent text focuses on methods. This book provides actual readings and examples on which to practice new skills. It may also be used in tandem with any introductory or intermediate epidemiology text to give the student critical skills in reading and interpretation. The readings continue to boil down tough concepts in infectious disease epidemiology, stripping away jargon and replacing it with key concepts that may be applied to more advanced work in the classroom or in the field. The book is uniquely organized around the themes of ID epidemiology rather than by chronology and mirrors the structure of the main textbook to create a more engaging experience for the reader. Each excerpt includes an introduction to the historic or cultural context, a description of the take-home message of the passage, excerpt or graph, suggested study questions, or practice problems. Also included: **Cassell's illustrated readings** Cassell, Ltd, 1875 **Wrestling With the Angel: A Memoir of My Triumph Over Illness** Max Lerner, 1991-08-15 Journalist Max Lerner writes a stunningly honest account of the feelings and thoughts that marked his battle with two successive cancers and a heart attack. Journal entries from this extraordinary ordeal show how mind and body interweave in the healing process. A worthy companion to *Anatomy of an*
