Ready To Answer All Bells:

Ready to Answer All Bells David D. Bruhn, 1997 The first American book on shipboard engineering in nearly twenty years this useful reference offers a guiding philosophy to new experienced and prospective engineers Focusing on the art of the engineer rather than the doctrine and regulations that govern the technical side of the billet it helps them be more effective at their jobs Assuming that readers already possess basic knowledge of engineering principles and practices the author sets forth a coherent blueprint to achieve and maintain the level of readiness necessary to support sustained operations at sea This guide provides insights born of the diverse and hard won deckplate experience of former engineer officers aboard a variety of ships and submarines The author and contributors who have served in a number of engineering positions both at sea and ashore include a former commander of a destroyer readiness squadron a former commanding officer of a nuclear powered attack submarine and three officers currently commanding conventional gas turbine or diesel powered surface ships Acknowledging that the always demanding duties and responsibilities of the fleet s engineer officers have become even more challenging in recent years as funds for maintenance and training decrease they emphasize the need for shipboard engineers not only to master technical knowledge but to lead manage and optimize the use of the personnel and material assets available to them Their collective wisdom will help flatten the seemingly overwhelming learning curve that engineers must climb From taking over the department through overhaul to the various evolutions and assessment processes that confirm readiness to deploy to faraway regions of the world this book guides the reader through all the challenges that the engineer officer will encounter striking a balance between current fleet conventions and engineering practices that have stood the test of time Navy Coast Guard and Merchant Marine engineering officers and Navy surface and submarine warfare officers will all benefit from heeding its advice which until now could only be learned through experience Heart of Stone Girard Clacy, 2001-04-29 Global climatic changes during the early part of the 21st century have placed enormous demands on fossil fuels Global warming has altered the once predictable weather patterns for the whole planet The largest shifts in weather have put the United States in the year 2004 at risk of freezing to death if something isnt done about the problem Fossil fuels have been in the final stages of exhaustion for some time however with the shifting weather patterns this demand has become an unquenchable thirst Even in late 1999 as his Presidency was ending Bill Clintons gesture to open up the oil reserves was to no avail The Exxon Company one of the only oil companies left after the stock market Crash of 2000 reported that they have built two huge ships to bring back large quantities of natural gas to the United States from overseas Will the United States freeze to death Find out in Girard Clacys finest techno thriller Liquefied natural gas is both unseen and highly explosive in its pure state and the CORAZON DE PIEDRA on her maiden voyage is filled full Walk up the gangplank of a ship carrying 750 000 cubic feet of LNG Wives and Warriors Laurie Weinstein, Christie White, 1997-04-22 This book is about the women who serve the military as wives and those who serve as soldiers sailors and flyers Comparing wives and warriors
