**Social Organization and Social Usages of the Indians of the Creek Confederacy** John Reed Swanton, 1928 Social Order and Political Change Duane Champagne, 1992-07-01 Under what conditions can democratic governments be formed and become stable The author addresses this question in a unique way that brings sociological and political theory to bear on the study of traditional societies long the preserve of historians and anthropologists By examining in detail the history of four American Indian societies the Cherokee the Choctaw the Chickasaw and the Creek the author documents a general theory of politics and constitutional government The four societies present an opportunity to study the process of democratic institution building in a controlled comparative historical context The societies were subject to similar geopolitical relations with the United States they were incorporated into the same sequence of world economic system relations initially fur trade and then the cotton market they experienced the emergence of class structures and they all produced some form of constitutional democracy The Cherokee however adopted a stable constitutional government earlier and with less coercion than the other three nations Why was this so With the aid of comparative analysis the author finds the answer in the Cherokee differentiation of politics from the nationally and religiously ordered clan system This set of institutional relations allowed the Cherokee to maintain a strong sense of social solidarity while tolerating conflict increased political differentiation and formation of a political nationality The other three societies were either less differentiated or less socially unified They formed their constitutional governments thirty to forty years later than the Cherokee and with more internal political coercion and in the Creek case with less political stability The formation and stabilization of democratic state governments is a major issue in such

contemporary phenomena as political change in Third World nations and the transformation of the governments of Eastern Europe The four case studies presented in this book form the basis of a new and powerful theoretical argument for understanding historical patterns of democratic change political stability and the relations of political power

**The Sacred Landscape of the Inca** Brian S. Bauer, 2010-07-22. The ceque system of Cusco, the ancient capital of the Inca empire, was perhaps the most complex indigenous ritual system in the pre-Columbian Americas. From a center known as the Coricancha (Golden Enclosure or the Temple of the Sun), a system of 328 huacas (shrines) arranged along 42 ceques (lines) radiated out toward the mountains surrounding the city. This elaborate network, maintained by ayllu kin groups that made offerings to the shrines in their area, organized the city both temporally and spiritually. From 1990 to 1995, Brian Bauer directed a major project to document the ceque system of Cusco. In this book, he synthesizes extensive archaeological survey work with archival research into the Inca social groups of the Cusco region, their land holdings, and the positions of the shrines to offer a comprehensive empirical description of the ceque system. Moving well beyond previous interpretations, Bauer constructs a convincing model of the system's physical form and its relation to the social, political, and territorial organization of Cusco.
