Red Tram:

The Red Tram Christian Karlson Stead, 2004 From one of New Zealand's most celebrated writers comes this poetry collection that encompasses moving memories of childhood and ruminations on horses and cows Auckland and even the author's own legs These satirical poems take weapons from the writers of the past and skewer politicians of the present and reflect on a range of international writers including Allen Curnow Janet Frame and Denis Glover With sometimes biting and often humorous poems that reference both classical Latin poets and contemporary concerns this collection breathes with an incomparable sense of energy speed and force

The Rise of the Paris Red Belt Tyler Stovall, 2024-06-21 From 1920 until the present the working class suburbs of Paris known as the Red Belt have constituted the heart of French Communism providing the Party not only with its most solid electoral base but with much of its cultural identity as well Focusing on the northeastern suburb of Bobigny Tyler Stovall explores the nature of working class life and politicization as he skillfully documents how this unique region and political culture came into being The Rise of the Paris Red Belt reveals that the very process of urban development in metropolitan Paris and the suburbs provided the most important opportunities for the local establishment of Communist influence The rapid increase in Paris suburban population during the early twentieth century outstripped the development of the local urban infrastructure Consequently many of these suburbs often represented to their new residents as charming country villages soon degenerated into suburban slums Stovall argues that Communists forged a powerful political block by mobilizing the disillusionment and by improving some of the worst aspects of suburban life As a social history of twentieth century France The Rise of the Paris Red Belt calls into question traditional assumptions about the history of both French Communism and the French working class It suggests that those interested in working class politics should consider the significance of residential and consumer issues as well as those relating to the workplace It also suggests that urban history and urban development should not be considered autonomous phenomena but rather expressions of class relations The Rise of the Paris Red Belt brings to life a world whose citizens though often overlooked are nonetheless the history of modern France This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1990

Carmageddon Daniel Knowles, 2023-03-28 A high octane polemic against cars which are ruining the world while making us unhappy and unhealthy from a talented young writer at the Economist Briskly written well researched and with a knack for landing the significant statistic right after the crisply summarized argument The New Yorker In Carmageddon journalist Daniel Knowles outlines the rise of the automobile and the costs we all bear as a result Weaving together history economics and reportage he traces the forces and decisions that normalized cars and cemented our reliance on them The automobile was one of the most miraculous inventions of the 20th century It promised freedom style and utility But sometimes rather than improving our lives technology introduces overwhelming problems Over the past century cars have filled the air with toxic pollutants and fueled climate change Cars have stolen public space and made our cities uglier dirtier less useful and more unequal Cars have caused tens of millions of deaths and injuries They have wasted our time and our money Knowles takes readers around the world to show the ways car use has impacted people's lives from Nairobi where few people own a car but the city is still cloaked in smog to Houston where the Katy Freeway has a mind boggling 26 lanes and there are 30 parking spaces for every resident enough land to fit Paris ten times With these negatives Knowles shows that there are better ways to live looking at Amsterdam Copenhagen Tokyo and New York City
