Redeeming The Time A Political Theology Of The Environment:

Redeeming the Time Stephen Bede Scharper, 1998-06-01 A thoughtful and interesting contribution to environmental theology literature Choice Richly informative and provocative Review for Religious Stephen Bede Scharper has added a significant new book to the growing collection of Christian ecotheological offerings an admirable job of summarizing the main strands of Christian environmental theologies and highlighting the most valuable contributions of each heartfelt There is much to celebrate in this book presents a comprehensible and accessible guide to the major varieties of what Scharper calls Christian ecological theology In this book he succeeds not just in coherently summarizing a number of the most important voices in ecotheology but also in giving us a blueprint for the changed consciousness necessary to motivate a conversion from our destructive earth damaging behavior to a more earth friendly way of living Worldviews *A Political Theology of Nature* Peter Scott, 2003-03-06 This book argues that the modern separation of humanity from nature can be traced to the displacement of the triune God Locating the source of our current ecological crisis in this separation Peter Scott argues that it can only be healed within theology through a revival of a Trinitarian doctrine of creation interacting with political philosophies of ecology Drawing insights from deep ecology ecofeminism and social and socialist ecologies Scott proposes a common realm of God nature and humanity Both Trinitarian and political the theology of this common realm is worked out by reference to Christ and Spirit Christ's resurrection is presented as the liberation and renewal of ecological relations in nature and society the movement of the Holy Spirit is understood as the renewal of fellowship between humanity and nature through ecological democracy and the Eucharist is proposed as the principal political resource Christianity offers for an ecological age **Redeeming the time : a political theology of the environment** Stephen B. Bell, 2008 In *The Relevance of Bernard Lonergan's Notion of Self Appropriation to a Mystical Political Theology* Ian Bell takes on the issue of

the separation of the interior and exterior lives that has come to dominate mystical theology over the years The mystical life he claims is necessarily involved in the establishment of social structures and institutions that govern human living and the work of Bernard Lonergan on the human subject provides a means by which the connection between the interior and exterior lives may be established Because human persons operate in a consistent pattern regardless of a given moment s particularities mystical experience is no longer relegated to so called spiritual matters and the insights of mystics may be applied to the Christian call to live as agents of love With this connection in place mystical theology and political theology come together in a theology that is both mystical and political **The Ecological Life** Jeremy Bendik-Keymer,2006-01-19

Written as a series of lectures this open access title offers a humanistic perspective on environmental philosophy that challenges some of the dogmas of deep ecology and radical environmentalism while speaking for their best desires The book argues that being human centered leaves us open to ecological identifications rather than the opposite Bendik Keymer draws on analytic and continental traditions of philosophy as well as literature and visual media He argues for a sense of ecological justice consonant with human rights and shows how humanistic thinking is committed to deepening respect for life and our ecological orientation In a clear jargon free and conversational tone The Ecological Life presents a timely and important contribution to civic engagement in an ecological century The ebook editions of this book are available open access under a CC BY NC ND 4 0 licence on bloomsburycollections com [Saving Beauty](#) Kathryn B. Sideris,2017-08-15 In Consecrating Science Lisa Sideris offers a searing critique of The New Cosmology a complex network of overlapping movements that claim to bring together science and spirituality all in the name of saving our planet from impending ecological collapse Highly regarded in many academic circles these movements have been endorsed by numerous prominent scholars scientists historians and educators Their express goal popularized in numerous books films TED talks YouTube videos podcasts and even introductory courses at places like Harvard or Washington University is to instill in readers and audiences a profound sense of being at home in the universe thereby fostering environmentally responsible behavior Whether promoted as The New Story The Universe Story or The Epic of Evolution they all offer humanity a new sacred story

a common creation myth for modern times and for all people the evolutionary unfolding of the universe from the Big Bang to the present Evolutionary science and religious cosmology together at last But as Sideris shows however the New Cosmology actually underwrites a staggeringly anthropocentric vision of the world Instead of cultivating an ethic of respect for nature the project of consecrating science only increases human arrogance and indifference to nonhuman life Going back to the work of Rachel Carson and other naturalists the author shows how a sense of wonder rooted in the natural world and our own ethical impulses helps foster environmental attitudes and policies that protect our planet Provided by publishe
