In what ways can an individual person help reduce prejudice and discrimination in society? Benjamin Niklas Scher, 2013-01-23 Seminar paper from the year 2012 in the subject Sociology Individual Groups Society grade 1 33 Jacobs University Bremen gGmbH language English abstract This

paper starts by pointing out why stereotypes are harmful especially for the recipient Some consequences are increased anger depression and lower task performance Continuing by explaining how an individual can reduce discrimination within himself as well as in a group this paper draws from the three main theories of stereotype development namely social cognition perspective social identity perspective and the discursive perspective Drawing also from insights from the economic sociology I conclude that high status power and a position in a structural hole between groups are facilitators for combating discrimination Finally an example setting integrates the different theories and measure explained

Racial Reconciliation and the Healing of a Nation Austin Sarat, Charles J. Ogletree, 2017-10-24 The work at hand for bridging the racial divide in the United States From Baltimore and Ferguson to Flint and Charleston the dream of a post racial era in America has run up against the continuing reality of racial antagonism Current debates about affirmative action multiculturalism and racial hate speech reveal persistent uncertainty and ambivalence about the place and meaning of race and especially the black white divide in American culture They also suggest that the work of racial reconciliation remains incomplete Racial Reconciliation and the Healing of a Nation seeks to assess where we are in that work examining sources of continuing racial antagonism among blacks and whites It also highlights strategies that promise to promote racial reconciliation in the future Rather than revisit arguments about the importance of integration assimilation and reparations the contributors explore previously unconsidered perspectives on reconciliation between blacks and whites Chapters connect identity politics the rhetoric of race and difference the work of institutions and actors in those institutions and structural inequities in the lives of blacks and whites to our thinking about tolerance and respect Going beyond an assessment of the capacity of law to facilitate racial reconciliation Racial Reconciliation and the Healing of a Nation challenges readers to examine social political cultural and psychological issues that fuel racial antagonism as well as the factors that might facilitate racial reconciliation

The Importance of Target and Audience in Reducing Prejudice and Discrimination Through Intergroup Contact and Extended Contact Amy Ellard-Gray, 2019 This dissertation compared the efficacy of intergroup contact theory with an alternative prejudice reduction intervention extended contact An experimental manipulation utilizing direct and extended contact conditions was created in an effort to reduce heterosexual Americans sexual prejudice and subtle discrimination against the LGBTQ group Over the course of two studies I tested conditions that could give extended contact an advantage over direct contact I hypothesized that extended contact with a straight self identified ally would make extended contact more effective than direct contact with a gay person Study 1 was a 2 participant gender x 2 target's sexual orientation gay straight x 2 target's explicit support for

LGBTQ issues ally advocate non ally non advocate between subjects experimental design Participants viewed a video in which a male target shared facts about sexual orientation and the harmfulness of prejudice and discrimination Participants completed an online pre test and a post test following the manipulation Study 2 was essentially a replication of Study 1 but an attempt was made to strengthen the manipulation of target s explicit support for LGBTQ issues Results showed that among participants with low previous contact with the LGBTQ group contact with a gay identified target resulted in lower subtle discrimination than extended contact The hypothesis that an ally would make extended contact more effective than direct contact was not supported in either study However Study 1 showed a novel finding that advocacy for LGBTQ issues was associated with higher subtle discrimination among those with low to no contact with the LGBTQ group regardless of sexual orientation of the contact This finding has implications for the application of prejudice reduction interventions in the real world In addition a pre post comparison of prejudice showed that the manipulation itself reduced prejudice over and above target s self disclosed identity suggesting potential for a video format prejudice reduction intervention tool that can be distributed through online channels for a large scale reach
