## **Redundant Heart:**

**Surgery of the Heart** J. Dyde, 2012-12-06 DR R E SMITH The first and second Coventry conferences on Surgery of the Oesophagus and Surgery of the Lung were arranged by Mr Roger Abbey Smith and they were so successful that he asked his colleague Mr J A Dyde to arrange one on Surgery of the Heart He willingly accepted this task and has also been joint Editor This book reproduces as faithfully as possible the papers and the discussion on the various subjects included in the Coventry conference The simple title Surgery of the Heart could be expanded to include the blood vessels Especially important is the anatomy of the various combinations and permutations of the pulmonary and systemic vessels These play a major role in the production of pulmonary hypertension First class investigations by radiologists and physiologists ascertain the precise situation which the surgeon will expect to find when he opens the chest indeed will help him to make the right approach Mr W G Williams helped with the social programme which enabled people to meet people Mr A Martin gave us valuable help in taping the recordings which Mrs J Jelley and Mrs V Bayliss Stranks ably transcribed The editorial staff of Plenum Publications have given us unsparing advice and guidance v PROLOGUE DR R E SMITH I welcome you all to this conference on Surgery of the Heart The Operated Heart at Autopsy Stuart Lair Houser, 2009-06-10 After 17 years of private practice as a cardiovascular surgeon my partners questioned the rationality of my decision to leave the clinical practice behind and become a cardiovascular pathologist In fact their disbelief of my intention to make the leap of faith was understandable For a surgeon the operating room is where the action is It is as simple as that And when a cardiac surgeon can hold in his hand a beating heart now off bypass and improved by an operation just completed satisfaction is real and profound However life is complex Throughout my surgical career questions regarding the pathogenesis of atherosclerotic cardiovascular disease arose curiosities of various phenotypes of the disease piqued my interest I became aware of the power of investigative techniques that might address these questions I then began to realize that my career in the operating room left me little time to address them I needed to study the disease full time in order to contribute to my understanding of it Ironically my first autopsy as a pathology resident was on an individual with a past history of coronary artery bypass surgery When it came to examining the heart the dissection as all pathologists know was complex However I found it to be straightforward and enjoyable But I subsequently learned that my fellow residents and mentors did not share my intrigue and comfort in defining the nuances of the operated heart

**The Road to Monterey** George Washington Ogden,1925 **Baroreceptor Reflexes** P.B. Persson,H.R. Kirchheim,2013-03-12 It is a great honor and pleasure for me to introduce this book an honor because of the scientific renown and authority of the investigators who have edited the volume and contributed the chapters a pleasure because my own long lasting interest in the baroreflexes has always gone in the same directions as those along which the authors of this book have conceived and organized their work It is particularly meaningful in my opinion that the very title of this volume underlines the integrative functions and the clinical aspects of baroreceptor reflexes Under the aspect of integration it is more and more apparent that baroreceptor reflexes though preponderantly influencing cardiovascular functions are not limited to cardiovascular control Their influence on respiration has been well known since the earliest studies on baroreflexes and wider influences have more recently been shown e g on hormone release on sleep and vigilance and on emotional behavior Even within the scope of cardiovascular regulation the integrated action of baroreflexes is not only directly exerted on the heart and blood vessels but is also exerted through more devious but no less important routes such as renin release from juxtaglomerular cells and sodium and water reabsorption by the renal tubules
