The Structure of Modern Standard French Maj-Britt Mosegaard Hansen, 2016-04-16 This book is an advanced student s grammar of French that

integrates traditional grammar with knowledge and insights from modern linguistics Maj Britt Mosegaard Hansen takes a structural approach to French grammar she provides clear descriptions of grammatical rules based explicitly on syntactic structure and places descriptive emphasis on instances where the grammatical structures of French differ from those used in corresponding contexts in English The first part of the book provides an introduction to French sentence structure before the following parts examine the grammar of verbs nominals particles and clauses and sentences The Structure of Modern Standard French will be a valuable resource for students of French at undergraduate level and beyond It assumes some prior knowledge of French grammar but is designed to be accessible to those with no background in linguistics *The Advanced Learner Variety* Emmanuelle Labeau, 2009 This volume originates from a workshop entitled Revisiting advanced varieties in L2 learning organized by the editors at Aston University Birmingham UK in June 2006 It consists of a peer reviewed selection of the best contributions Many different approaches have been used in the study of advanced learners and their characteristics Specific areas of language have repeatedly been found to remain problematic even at advanced levels and much empirical research has been carried out In particular areas of grammar such as the tense or agreement systems often pose difficulties as well as lexical idiosyncrasies such as formulaic sequences and the discourse pragmatic constraints operating in French This volume brings together recent research exploring the advanced learner capabilities in each of those domains as well as possible explanations for the difficulties they raise for the L2 learner of French Additionally one of the areas which has received considerable attention in the French L2 literature on advanced learners tense and aspect is also explored from the point of view of French learners of English to explore any parallels In presenting this research the book clarifies the concept of the advanced learner how does s he differ from native speakers and why

Universals in Comparative Morphology Jonathan David Bobaljik, 2012-10-05 An argument for and account of linguistic universals in the morphology of comparison combining empirical breadth and theoretical rigor This groundbreaking study of the morphology of comparison yields a surprising result that even in suppletion the wholesale replacement of one stem by a phonologically unrelated stem as in good better best there emerge strikingly robust patterns virtually exceptionless generalizations across languages Jonathan David Bobaljik describes the systematicity in suppletion and argues that at least five generalizations are solid contenders for the status of linguistic universals The major topics discussed include suppletion comparative and superlative formation deadjectival verbs and lexical decomposition Bobaljik s primary focus is on morphological theory but his argument also aims to integrate evidence from a variety of subfields into a coherent whole In the course of his analysis Bobaljik argues that the assumptions needed bear on choices among theoretical frameworks and that the framework of Distributed Morphology has the right architecture to support the account In addition to the theoretical implications of the generalizations Bobaljik suggests that the striking patterns of regularity in what otherwise appears to be the most irregular of linguistic domains provide compelling evidence for Universal Grammar The book strikes a unique balance between

empirical breadth and theoretical detail The phenomenon that is the main focus of the argument suppletion in adjectival gradation is rare enough that Bobaljik is able to present an essentially comprehensive description of the facts at the same time it is common enough to offer sufficient variation to explore the question of universals over a significant dataset of more than three hundred languages Translation, Linguistics, Culture Nigel Armstrong, 2005-05-11 This book takes a linguistic approach to translation issues looking first at the structural view of language that explains the difficulty of translation and at theories of cultural non equivalence A subsequent chapter on text types readership and the translator's role completes the theoretical framework The linguistic levels of analysis are then discussed in ascending order from morpheme up to sentence while a summarising chapter considers various translation types and strategies again considered in relation to text type author and reader

Foundations of French Syntax Michael Allan Jones, 1996-09-12 Designed for students this detailed analysis of the principal areas of French grammar combines the insights of modern linguistic theory with those of more traditional grammarians Theory is placed firmly in the service of description and analysis and students are guided to an understanding of the French language which will complement the information offered by traditional reference grammars The book includes discussion of verbs and verb phrases voice tense and mood the noun phrase and pronouns prepositions and variations in sentence structure The author pays special attention to those areas of French grammar which pose difficulties for an English speaking reader Each chapter is followed by a set of problems and exercises and by a useful guide to further reading Foundations of French Syntax assumes no prior knowledge of linguistics and will appeal to students and teachers of linguistics French and other Romance languages
