Shaping the Bar Joan Howarth,2022-12-13 The comprehensive source on attorney licensing and how to reform it In Shaping the Bar Joan Howarth describes how the twin gatekeepers of the legal profession law schools and licensers are failing the public Attorney licensing should be laser focused on readiness to practice law with the minimum competence of a new attorney According to Howarth requirements today are both too difficult and too easy Amid the crisis in unmet legal services record numbers of law school graduates disproportionately people of color are failing bar exams that are not meaningful tests of competence to practice At the same time after seven years of higher education hundreds of thousands of dollars of law school debt two months of cramming legal rules and success on a bar exam a candidate can be licensed to practice law without ever having been in a law office or even seen a lawyer with a client Howarth makes the case that the licensing rituals familiar to generations of lawyers unfocused law degrees and obsolete bar exams are protecting members of the profession more than the public Beyond explaining the failures of the current system this book presents the latest research on competent lawyering and examples of better approaches This book presents the path forward by means of licensing changes to protect the public while building an inclusive diverse competent ethical

profession Thoughtful and engaging *Shaping the Bar* is both an authoritative account of attorney licensing and a pragmatic handbook for overdue equitable reform of a powerful profession *International perspectives in social justice programs at the institutional and community levels* Enakshi Sengupta, Patrick Blessinger, 2021-04-09 Universities and faculty members play a vital role in providing education that helps build a strong foundation for a society where people get equal opportunities for upward social mobility This book addresses the role of education in overcoming poverty and oppression by imparting social justice education at the institution and community level *Reflective Practice and Its Potential to Enhance Clinical Legal Education and Support Social Justice Work of Law Clinics in Nigeria* Odinakaonye Lagi, 2023 This study explored what role reflective practice has in Nigerian clinical law programmes and aimed to understand how the concept is used in teaching and learning in law clinic practice and social justice work The theoretical concept of reflective practice in clinical legal education is still an emerging concept in legal education with suggestions for an integrative and expansive framework Leering 2014 Lowenberger 2019 Madhloom 2019 Seear et al 2019 Spencer and the concept that reflective practice should be an integrative process inclusive of cognitive and emotional processes The methodological framework used a qualitative case study situated within a constructivist paradigm that incorporated contextual background of law clinics in Nigeria and the complexities law clinics face in dealing with their intervention in social justice issues Data collection was through in depth semi structured interviews with open ended questions I interviewed six participants comprised of clinical law teachers selected through purposeful sampling and data analysis was a comparative process moving from inductive to deductive processes by identifying meaningful and relevant themes Merriam b reflections occurred during out of classroom experiential learning at different stages of law clinic practice cycle and community outreaches c reflection supported learning and helped to address issues brought forward as a result of emotions triggered during law clinic activities d participants connected their practice to theory and provided a framing of reflective practice which had not existed prior to this study and e reflective practice was fundamental in assessing the impact of clinical legal education on students and teachers in the development of professional skills and social values and communities in addressing legal needs Teaching clinically was seen as reflective teaching which holistically integrated critical reflection reflection in action and reflection on action and created space for the role of emotions and relational learning in legal practice Law clinic practice evoked deep emotions for students when exposed to societal harms and the criminal justice system The study however indicated that reflective practice was implicitly an integral part of clinical legal education that needed to be made more explicit through increased documentation of processes to promote transferability of knowledge and practice in legal education The study provided a theoretical guide in framing and supporting a framework for an expansive concept of reflective practice for clinical legal education and for the legal profession **Reimagining Clinical Legal Education** Linden Thomas, Steven Vaughan, Bharat Malkani, Theresa Lynch, 2018-10-04 Clinical Legal Education CLE can be defined in broad terms as the study of law through real or simulated

casework It enables students to experience the law in action and to reflect on those experiences CLE offers an alternative learning experience to the traditional lecture seminar method and allows participants to take the study of law beyond the lecture theatre and library CLE has been a part of English law schools for several decades and is becoming an increasingly popular component of a number of programmes It is also well established in North America Australia and many other countries around the globe In some law schools CLE is credit bearing in others it is an extracurricular activity Some CLE schemes focus on social welfare law whilst others are commercially orientated A number are run in conjunction with third sector organisations and many are supported by private practice law firms This edited collection brings together academics lawyers third sector organisations and students to discuss the present experience and potential of CLE As such it will be of interest to a wide and diverse audience both within and outside the UK Reinventing Legal Education Alberto Alemanno, Lamin Khadar, 2018-05-24 European legal teaching historically formalistic doctrinal hierarchical and passive is coming under increasing pressure to reimagine itself as pragmatic policy aware and action oriented Out of this context a bottom up movement of university law clinics appears to be emerging in Europe Although intellectually indebted to the US model the European variant reflects legal education and practice in Europe specifically the multi layered and multi genetic legal landscape resulting from the Europeanization and internationalization of national legal systems the globalization of European legal markets and the growing demand for civic engagement in view of increasingly powerful supra national institutions Through the prism of clinical legal education *Reinventing Legal Education* is the first attempt to gather scholarly and systematic reflections on the developments taking place in European legal teaching and practice This groundbreaking book should be read by anyone interested in how clinical legal education is reinventing legal education in Europe

Epistemic Communities at the Boundaries of Law Cecilia Blengino, Andrés Gascón-Cuenca, 2019 As richly described in the various chapters of this book we see that clinics can act as a window to the functioning of law and the legal system Clinics allow students and faculty to see how laws and the legal system are functioning for groups of people who otherwise likely would not be a part of the common experience of professors and their students poor people generally migrants and refugees women and children exploited by trafficking people with disabilities ethnic minorities prisoners and so on Legal systems the world over tend to give less care and attention to the problems of the poor and other disempowered groups and such people usually lack access to well educated legal advocates to help them fight to make the legal system work for them Through clinic cases students and faculty see the day today lives of people marginalized by the society see how the law affects and influences their lives and see how it serves or fails to serve them For law professors involved in clinical education such as the authors of this book heightened awareness of the law's operation for poor people adds another important perspective to the subjects of their research and work as commentators on the law Students can also be inspired to select topics for research papers master or PhD theses by exposure to problems in the law and legal system as it functions for their clients Dall

Wellbeing and Transitions in Law Emma Jones, Caroline Strevens, 2023-08-09 This book examines transitions from law school to the legal profession and their impact on wellbeing There is a significant body of evidence that suggests law student wellbeing is particularly problematic partially due to the distinctive nature of law as a discipline Similarly there is a growing body of international evidence demonstrating poor levels of wellbeing within the legal profession with lawyers suffering higher levels of stress anxiety and depression than the general population To date there has

been no detailed consideration of the impact of these transitions on wellbeing or discussion of the best ways to ameliorate any negative effects This edited collection will explore a range of transitions from entry into law school through to progression to managerial roles within the legal profession Rather than focusing on discrete areas or chunks of time this book focuses on the process of transitioning holistically **The Ethics Project in Legal Education** Michael
