Barrera, 2001-08-09 As western economies have moved from feudalism to industrialism to the information age Catholic social thought has kept pace responding to the economic realities of the day Linking Catholic social teaching with modern economic theory Albino F Barrera examines the changing political economy embedded within the moral theology and social justice documents issued by the Church during the last hundred years Barrera discusses the evolution of Catholic social teachings from scholastic thinking on the concept of the just price to a modern emphasis on the importance of a living wage As the conduct of economic life according to traditional custom and common law has given way to institutional and impersonal market forces these teachings have moved from a preoccupation with personal moral behavior to an intense scrutiny of the structures of society Amidst these changes the Church's social documents have sought to address systemic shortcomings as a means of promoting the common good through economic justice Barrera also looks ahead to the challenges posed by a postindustrial society characterized by a global knowledge based economy arguing that Catholic social thought will likely shift its focus from advocacy of the living wage to demands for greater equality of socioeconomic participation Written for scholars and students of economics theology and political science interested in religious social thought this book bridges the gap between moral theology and economic theory **Economists in the Americas** Veronica Montecinos, John

Pope Atkins,2018-02-06 The fourth

edition of this widely praised text has been thoroughly revised to reflect the evolving characteristics of the current international system that have had a dramatic effect on every aspect of international relations of Latin America and the Caribbean. The original purpose of this book is unchanged. It continues to provide a topically current and analytically integrated survey of the region's role in the world. Still organized around the idea of Latin America and the Caribbean as a separate subsystem within the global international system, the discussion gives special emphasis to complex interstate and transnational structures and processes. Within this framework, Atkins analyzes the foreign policies of the Latin American states themselves and those of the United States and other countries toward Latin America and the Caribbean. He also looks closely at the nature and role of transnational actors in the region such as the multinational corporations, the Holy See, Protestant Churches, transnational political parties, international labor, nongovernmental organizations, and others. He gives special attention to Latin American participation in international institutions at all levels.

**Reforming the State** Luiz Carlos Bresser Pereira, Peter Spink, 1999. The authors of this volume explore general themes of managerial public administration and government reform, then focus on specific Latin American experiences and trends. Discussions of accountability, empowerment, citizen values, and new institutions are also included.

**The Case Against the Global Economy** Jerry Mander, 2014-02-25. The greatest political debate of our time is about the blind rush towards a single global economy, its consequences for jobs, democracy, human well-being, and cultural diversity, and its impact on the natural world that sustains us. Its effects will be profound and irreversible, but globalization itself is not inevitable. In *The Case Against the Global Economy*, 24 leading economic, agricultural, cultural, and environmental authorities drawn from across the world argue that free trade and economic globalization are producing exactly the opposite results to those promised. From a detailed analysis of the new global economy, its structures, and its full social and ecological implications, they show how it is undermining our liberty, our security, and our well-being, and is devastating the planet. First published in the USA in 1996 in an edition focused on North America, the book won the American Political Science Association award for the Best Book in Ecological and Transformational Politics. This completely revised and updated international edition presents a passionate and persuasive case for the need to reverse course away from globalization and towards a revitalized democracy, local self-sufficiency, and ecological health.

*The Politics of Expertise in Latin America* Miguel A. Centeno, Patricio Silva, 2016-07-27. The ascendancy of technocratic personnel and their imposition of neo-liberal economic policies have come to define Latin American politics in the 1980s and 1990s. This book is the first comparative analysis of these events and their implications for the future of democracy on the continent. Individual chapters discuss the rise to power of these technocrats in Mexico, Chile, Argentina, Brazil, and Peru, as well as the historical antecedents of expert rule in the 19th and early 20th centuries.

**Globalization and the Distribution of Wealth** Arie M. Kacowicz, 2013-02-07. This book links theoretical discussions about globalization and the distribution of wealth with a rich empirical analysis of Latin America.
