## **Reform And Regulation Of Property Rights:**

**Reform and Regulation of Property Rights**, 1997 **Reform and Regulation of Economic Institutions in Afghanistan** Haroun Rahimi, 2022-10-21 Taliban's return to power in August of 2021 caused everyone to ask why the two decades of institution building in Afghanistan failed. This book investigates the root causes of failed reforms in an important area of reform: trade and credit institutions. It explains why the efforts to reform and regulate the economic institutions in Afghanistan failed and what we can learn from their failure. It draws on more than eighty interviews with Afghan merchants, business leaders, money dealers, and government officials in five major provinces of Afghanistan to identify the barriers to access to credit and to understand the performance of formal institutions, banks, and their informal counterparts. This book finds that Afghan merchants were often unable to benefit from the offerings of formal institutions for three reasons: a highly volatile business climate, uncertain contract enforcement, and an unsupportive property rights system. Several informal institutions have emerged that alleviate some of the credit constraints on Afghan merchants. These informal institutions include risk sharing, trade credit, operations, money dealers, short-term working capital loans, Gerawee, and Sarqufli. Although these informal institutions have helped Afghan merchants survive, they are unable to support economic growth. This book argues that countries like Afghanistan should solve their institutional dilemma by adopting an approach which the author calls Grounded Institutional Reform. Using this approach, a country would formalize existing informal institutions, a development that would vastly increase their effectiveness. While this book focuses on credit and trade in Afghanistan, the analysis of formalizing the informal can easily be extended to solve other types of economic problems in similarly situated countries. This book should be of great interest to scholars, policymakers, and development workers in the field of law, finance, and development.

**Regulatory Property Rights** Christine Godt, 2016-11-21 In *Regulatory Property Rights: The Transforming Notion of Property in Transnational Business Regulation*, editor Christine Godt generates fresh impetus for rethinking modern property theory. The book's central theme is the transformation of property in response to societal changes brought about by internationalization, digitalization, and new forms of collective action. The contributions sketch a vision of modern property which grew out of 18th and 19th century ideologies. It operates in the modern multilevel system and is not confined to the nation-state. It is conscious about the broad range of functionalities of the title holder with regard to managing international supply and distribution chains and modern rationalities of the capital market and at the same time acknowledges the legitimate interests of third parties and modern forms of governance.
