Developments in Numerical and Experimental Methods Applied to Tribology D. Dowson, C. M. Taylor, M.

Godet, 2014-05-20 Developments in Numerical and Experimental Methods Applied to Tribology contains the proceedings of the 10th Leeds Lyon Symposium on Tribology held at the Institut National des Sciences Appliquées in Lyon France on September 6-9 1983. The papers explore developments in numerical and experimental methods used in tribology and cover topics ranging from ferrography and rheology to bearings and bearing dynamics hydrodynamics contact phenomena and plasticity. The papers are organized into 13 sessions. The first two papers examine the use of ferrography in the analysis of non ferrous particles as well as some of the methods of obtaining approximate numerical solutions to boundary value problems that arise in elastohydrodynamic lubrication. The next session is concerned with rheology and contains papers that describe numerical solutions for power law fluids as applied to slider bearings grease lubricated finite length bearings and the use of the ball bearing as rheological test device. The papers that follow discuss bearings and their dynamics oil films on lubricated surfaces hydrodynamic lubrication and finite element analysis of transient elastohydrodynamic lubrication. The final session considers plastic deformation two body abrasion processes and micropitting and asperity deformation. This monograph will appeal to tribologists.

Sexuality, Law and Legal Practice and the Reformation in Norway Anne Riisøy, 2009-02-23 Based on legislation and legal practice from the period c 1250-1600 the book takes issue with the most important viewpoints in earlier research by early modernists that the Reformation represented a watershed in a development characterized by greater criminalisation of sexual acts increase in the severity of sentences and deterioration of the position of women. According to this study in principle all or mostly all factors were already in place in the Middle Ages. In Norwegian historiography the period investigated is characterized by paucity of sources and the period has tended to fall between two stools respectively the medievalist and the early modernist. The ambition of this book has been to bridge the gap.
