Right To Learn Alternatives For A Learning Society:

The Right to Learn Ken Brown, 2002-11-01 The concept of the learning society brings to mind access to education for all and a culture of lifelong learning But government interventions in education such as the National Curriculum and standardized tests have only served to consolidate the connection between learning and schooling Schools furthermore now have to juggle an increasingly diverse and incompatible range of tasks providing equal opportunities while catering for individual needs and hitting academic attainment targets while preparing pupils for life in the global workplace In this climate what is the future for a democratic system of education This important book aims to encourage debate about alternative ways of providing education and discusses how these are being practiced now in Britain Europe and the USA Taking the issue of human rights and access as a central theme the author examines the current state of education provision and the possibilities for its future This book will be of interest to specialists in education politics and philosophy and also to those seeking alternative ways of educating their children

The Right to Learn Ken Brown, 2002-11 The Right to Learn raises questions about the future of the learning society It suggests that the rights of children and parents are not being addressed by the UK Government's concentration on a highly centralized education system

Making Sense of Lifelong Learning Norman Evans, 2003 This book looks beyond the current rhetoric about lifelong learning and asks long overdue questions on the motives of institutions employers and the Government in promoting it and who says what is or is not lifelong learning

The Human Rights-Based Approach to Higher Education Jane Kotzmann, 2018-04-05 A human right to higher education was included in the International Covenant on Economic Social and Cultural Rights ICESCR which came into force in 1976 Yet the world has changed significantly since the ICESCR was drafted State legislation and policies have generally followed a neoliberal trajectory shifting the perception of higher education from being a public good to being a commodity able to be bought and sold This model has been criticized particularly because it generally reinforces social inequality At the same time attaining higher education has become more important than ever before Higher education is a prerequisite for many jobs and those who have attained higher education enjoy improved life circumstances This book seeks to determine Is there still a place for the human right to higher education in the current international context In seeking to answer this question this book compares and contrasts two general theoretical models that are used to frame higher education policy the market based approach and the human rights based approach In the process it contributes to an understanding of the likely effectiveness of market based versus human rights based approaches to higher education provision in terms of teaching and learning This understanding should enable the development of more improved sophisticated and ultimately successful higher education policies This book contends that a

human rights based approach to higher education policy is more likely to enable the achievement of higher education purposes than a market based approach In reaching this conclusion the book identifies and addresses some strategic considerations of relevance for advocates of a human rights based approach in this context

An Alternative Framework for Community Learning Centers in the 21st Century Michael F. Reber, 2003 Public Community Learning Centers CLCs at least in the context of the United States are social structures that have been established to address particular community needs In the beginning they were instituted as extensions of state departments human services in order to assist communities with programs such as adult literacy and high school graduation certification Today they have taken on a broader role as a result of the Elementary and Secondary Education Act Title X Part I that gives rural and inner city public schools nearly 2 billion over five years 1999 2004 to develop CLCs for programs such as mentoring in basic skills or helping high school students prepare for college Despite these noble efforts public CLCs are still not integral parts of community sustainability One could argue that a major cause for this is that they are established mainly for political purposes However the problem is much deeper Public CLCs today are unable to serve as sustainable social structures because they lack several foundational principles that assist communities with creating and maintaining sustainability In short they do not adequately reflect the values beliefs and knowledge of the current community education movement Thus an alternative framework within which communities can develop CLCs is needed Using a systemic design approach toward the design of a community learning system an alternative framework for CLCs is designed that enables communities to create the conditions whereby they can become self reliant self governing and sustainable
